BILL OF SALE AND ASSIGNMENT OF PATENTS

This Bill of Sale and Assignment is made this 7th day of April, 2008, by Big Bore Express, LTD, an Idaho Corporation, hereinafter "Seller" and is delivered to Accura Bullets, LLC, an Idaho Limited Liability Company, hereinafter "Purchaser".

RECITALS

Seller is the Owner and Assignor of two United States Patents, described as (1) "Firearm Projectile," Patent No. 5,458,064 issued on October 17, 1995, and (2) "Method For Loading A Muzzle-Loading Firearm," Patent No. 5,621,187 issued on April 15, 1997, hereinafter, the "Patents". The inventor and original holder of the Patents was Robert M. Kearns, hereinafter, the "Inventor".

Seller acquired the exclusive right to manufacture and sell products that are subject to the scope of the Patents under a Licensing Agreement between Seller and Inventor, dated January 27, 1998. In order to effect a full and complete sale of Inventor's Patents to Seller, Inventor and Seller executed a Bill of Sale and Assignment of Patents dated November 5, 2001, whereby Seller acquired all right, title and interest in the Patents.

Seller and Purchaser now desire to effect a full and complete sale of Seller's Patents to Purchaser.

Now, therefore, for the sum of one thousand dollars (\$1,000.00) and other good and valuable consideration:

1. Seller hereby sells, conveys, transfers and assigns all of its right, title and interest in and to the Patents as described above and as more particularly described on Exhibits "A" and "B" attached to this Bill of Sale and Assignment of Patents. This Bill of Sale and Assignment of Patents shall include a sale and transfer of all of the rights of an Owner in the Patents, including but not limited to the Patent owner's right to receive all royalties from any persons or entities hereinafter licensed to manufacture or sell products subject to the scope of the Patents and from those persons who are otherwise infringing upon the Patents, including past infringements. The sale and assignment shall be a full, final and unconditional sale and assignment of all of Seller's interest in the Patents, and Seller shall execute and deliver to Purchaser an Assignment of Patent for each of the two Patents in a form required by and/or acceptable to the United States Patent Office. Seller shall file completed Assignment of Patent documents with the United States Patent Office.

2. Seller further covenants and warrants to Purchaser: that Seller is the Owner of these two Patents; that there are no other owners or inventors with rights to these Patents; that Seller has not hypothecated, mortgaged or encumbered these

Patents; that Seller has not granted a license to anyone to use these Patents; and that Seller shall warrant and defend the Purchaser's rights in the Patents against the claims of any third parties, entities or persons claiming rights that are contrary to Seller's covenants and warranties or the rights of Purchaser.

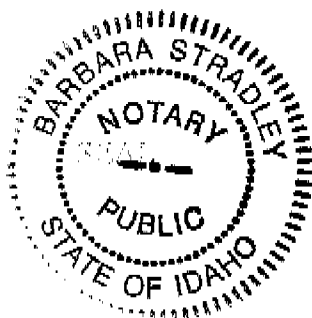

Dated the day above first written.
