U.S. PATENTS ASSIGNMENT

This U.S. PATENTS ASSIGNMENT ("Patent Assignment") made as of April 22, 2008 and effective as of February 29, 2008 by Reynolds Metals Company, a Delaware corporation having a principal place of business at 6603 West Broad Street, Richmond, Virginia 23261 ("Assignor"), and Reynolds Foil Inc., a Delaware corporation, having a principal place of business at 6603 West Broad Street, Richmond, Virginia 23230 ("Assignee").

WHEREAS, Alcoa Inc. and Rank Group Limited are parties to the Acquisition Agreement, dated December 21, 2007, as amended (the "Agreement"), providing for the execution and delivery of this Patent Assignment;

WHEREAS, Assignor is the owner of the improvements, patents and patent applications listed in the attached Schedule A (collectively, the "Assigned Patents"); and

WHEREAS, Assignee is desirous of acquiring all of the right, title and interest of Assignor in, to and under the Assigned Patents.

NOW, THEREFORE, in consideration of the sum of Ten Dollars United States (\$10.00 US) and other good and valuable consideration paid by Assignee to Assignor, the sufficiency and receipt of which is hereby acknowledged, Assignor and Assignee agree as follows:

Assignor does hereby transfer and deliver, or cause to be transferred and delivered, to Assignee all right, title and interest of Assignor in and to the Assigned Patents, including without limitation the right to make, to use, to sell and to offer for sale the inventions of the Assigned Patents, and any divisions, continuations, continuations-in-part, and renewals thereof and foreign counterparts thereof; and all rights, interests, claims and demands recoverable in law or equity that Assignor has or may have in profits and damages for past, present and future infringements of the Assigned Patents, including without limitation the right to compromise, sue for and collect such profits and damages; all of the foregoing to be held and enjoyed by Assignee, its successors and assigns or their legal representatives as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made.

Assignor further authorizes and requests the Commissioner of Patents and Trademarks to record ownership of the Assigned Patents as the property of Assignee.

Assignor agrees on behalf of itself, its directors, officers, employees, agents, successors, assigns, and legal representatives to execute any and all papers and instruments and to do any and all acts which may be necessary or reasonably requested by Assignee, in order to carry into full force and effect this sale, assignment and transfer,

including without limitation to vest in Assignee or its assigns title in and to the Assigned Patents. Without limiting the foregoing, Assignor will communicate to the Assignee, its successors, legal representatives and assigns, any facts known to it respecting the improvements, and testify in any legal proceeding, sign all lawful papers, execute all divisional, continuing and reissue applications, make all rightful oaths and generally do everything possible to aid the Assignee, its successors, legal representatives and assigns, to obtain and enforce proper patent protection for the improvements in the United States.

This Patent Assignment may be executed and delivered (including by facsimile transmission or otherwise electronically) simultaneously in counterparts, each of which when executed will be deemed an original but all of which together will constitute one and the same instrument.

This Patent Assignment shall be governed by, and construed in accordance with, the laws of the United States in respect to patent issues, and in all other respects, including as to validity, interpretation and effect by the internal laws of the State of New York applicable to agreements made and to be performed entirely within such State.
