## PATENT ASSIGNMENT

This PATENT ASSIGNMENT (this "Patent Assignment"), is effective as of 12:01 a.m., Eastern Standard Time, on May 1, 2008, by BioProcess Technologies, Ltd., a Rhode Island corporation (hereinafter "Assignor"), in favor of BioProcessH2O LLC, a Delaware limited liability company ("Assignee").

WHEREAS, Assignor is the sole owner of the entire right, title and interest in and to the patents and patent applications listed in Schedule A hereto (the "Patents");

WHEREAS, Assignee is desirous of acquiring the entire right, title and interest in, to and under said Patents.

NOW, THEREFORE, for good and valuable consideration paid by Assignee, the receipt and sufficiency of which is hereby acknowledged, Assignor does hereby assign, sell, transfer and convey to Assignee, its successor and assigns, all entire right, title and interest in and to the Patents and the underlying inventions and all inventions disclosed but not claimed, including without limitation the right to maintain and prosecute the Patents and the right of priority to file and prosecute corresponding applications in any and all countries, the rights to any divisions, continuations, continuations-in-part, reissues, reexaminations, re-registrations, renewals and extensions with respect thereto, and any and all right of Assignor to sue for, recover and retain damages for any past, present or future infringement thereof; the Patents to be held solely by Assignee, its successors or assigns.

Assignor authorizes and requests the Commissioner of Patent and Trademarks (and any other non-U.S. counterpart) to record Assignee as owner of the Patents, including any divisions, reissues, reexaminations or extensions thereof or continuations or continuations-in-part, and to issue any and all letters patent of the United States and any foreign jurisdiction thereon to Assignee, as assignee of the entire right, title and interest in, to and under the same, for the sole use and enjoyment of Assignee, its successors, assignees or other legal representatives.

Assignor agrees that it will communicate to Assignee any facts known to it respecting the invention(s) and improvement(s) of the Patents.

The Assignor undertakes at the request and expense of the Assignee to do all acts and execute all documents which may be necessary to confirm the title of the Assignee to the Patents assigned, whether in connection with any registration of such title or otherwise in any jurisdiction worldwide.

In the event that Assignee is unable for any reason to secure Assignor's signature to any document that it is entitled to hereunder, Assignor hereby constitutes and appoints Assignee as Assignor's true and lawful attorney in fact, with full power of substitution in Assignor's name and stead, to take any and all steps, including proceedings at law, in equity or otherwise, to execute, acknowledge and deliver any and all instruments and assurances necessary or expedient

in order to vest or perfect the aforesaid rights and causes of action more effectively in Assignee or to protect the same or to enforce any claim or right of any kind with respect thereto. Assignor hereby declares that the foregoing power is coupled with an interest and as such is irrevocable.

*[Signature Page Follows]*

IN WITNESS WHEREOF, the parties hereto have caused this Patent Assignment to be executed and delivered as of the date first above set forth.

ASSIGNOR: BioProcess Technologies, Ltd.
