(1) in and to an invention entitled "FUEL SYSTEM WITH PRESSURE REGULATION AND PRESSURE RELIEF" for which we have executed a United States patent application on even date herewith, said United States application being assigned U.S. Serial No. 11/693,507 filed March 29, 2007 (Attorney Docket No. 081276-9231-01);

(2) in and to said United States patent application, in and to all other patent applications (including divisional, continuation, continuation-in-part, §111(b) provisional, §111(a), reissue applications, and international patent applications designating the United States) based upon said invention, and in and to the patent or patents to be granted thereon, including reissues thereof, if any, to the full end of the term or terms for which said patent or patents may be granted; and

(3) in and to all patent applications on said invention now or hereafter filed in countries foreign to the United States of America, including patent applications filed under the Patent Cooperation Treaty, the European Patent Convention or any other international treaty, and including the right to claim priority of said United States application, and in and to any and all patents granted on said applications to the full end of the terms for which said patents may be granted.
