Re: Robert M. Berne, Rafael Rubio and Luiz Bellardinelli -

U.S. Patent Application S.N. 196,652 , filed on October 14, 1980

For: "Adenosine Antagonists in the Treatment and Diagnosis of -  
A-V Node Conduction"

Dear Sir:

Transmitted herewith are an original and two copies of a license to the United States Government on above subject invention. We would like to have this license recorded in the Public Section of the Government Register.

It will be appreciated if you will send the original and one copy, each showing the recording information, to the Patent Branch, Department of Health and Human Services, c/o National Institutes of Health, Westwood Building, Room 5A03, Bethesda, Maryland 20205.

Respectfully yours,

Sandra Sager  
Paralegal Specialist

3 Enclosures

Charlottesville, Virginia 22903  
have invented Adenosine Antagonists in the Treatment and Diagnosis  
of A-V Node Conduction (Invention)

and filed a patent application thereon in the United States of  
(country)

America bearing Serial No. 196,652, filing date October 14, 1980;  
and

WHEREAS, the invention was made in the course of research  
supported by the National Institute of Health, an agency of the  
United States Government; and

WHEREAS, the United States Government is entitled to certain  
rights in and to said invention and application by reason of the  
terms of such support; and

WHEREAS, the UNIVERSITY OF VIRGINIA ALUMNI PATENTS FOUNDA-  
TION, hereinafter called the "Licensor" has acquired by assign-  
ment from the inventors the entire right, title, and interest of  
the inventors to such invention;

NOW, THEREFORE

1. The Licensor, in consideration of the premises and other  
good and valuable considerations, hereby grants and conveys to  
the United States Government (including any agency thereof, state  
or domestic municipal government) a royalty-free, nonexclusive  
and irrevocable license, including the power to grant sublicenses,  
to make and use and sell for any governmental purposes, and on  
behalf of any foreign government pursuant to any existing or  
future treaty or agreement with the United States of America,  
embodiments of the invention described in the aforesaid applica-  
tion and in any and all divisions, continuations and continua-  
tion in part thereof, and in any and all patents which may be  
granted thereon, and in any and all reissues thereof, during the  
full term or terms thereof.
