ASSIGNMENT

DAVE LEHOTY, an individual residing at 1786 Fordham Way, Mountain View, CA 95040 (hereafter referred to as the "Assignor"), is the owner of United States Patent No. **6,795,227**, entitled "**Method and Apparatus For Driving Light-Modulating Elements**," and issued on September 21, 2004 (hereafter referred to as the "Patent").

SILICON LIGHT MACHINES CORPORATION, a corporation duly organized under and pursuant to the laws of **DELAWARE** and having its principal place of business at **3939 NORTH FIRST STREET, SAN JOSE, CALIFORNIA 95134** (hereafter referred to as the "Assignee"), desires to acquire the entire right, title, and interest in and to the Patent and all inventions described and claimed therein.

THEREFORE, in consideration of the sum of One Dollar (\$1.00) and other good and sufficient consideration, the receipt of which is hereby acknowledged, the Assignor hereby sells, assigns, transfers, and sets over to the Assignee, its successors, legal representatives and assigns the entire right, title and interest in and to the Patent identified above and all inventions described and claimed therein, the right to file applications on the inventions, and the entire right, title and interest in and to any applications for Letters Patent of the United States or other countries claiming priority to the Patent, including divisionals, continuations, and continuations-in-part of the Patent or applications, and reissues, reexaminations, renewals and extensions of the Patent or Letters Patents, and any and all Letters Patent or Patents of the United States of America and all foreign countries that may be granted therefor and thereon, and all rights under the International Convention for the Protection of Industrial Property, the same to be held and enjoyed by the Assignee, for its own use and behalf and the use and behalf of its successors, legal representatives, and assigns, to the full end of the term or terms for which the Patent has been granted, and for which Letters Patent or Patents may be granted, as fully and entirely as the same would have been held and enjoyed by the Assignor had the present sale and assignment not been made.

The Assignor agrees:

- a. to execute all papers necessary in connection with the Patent and any continuing, continuing-in-part, divisional, reissue, reexamination or corresponding application thereof in any country and also to execute separate assignment in connection with such application as the Assignee may deem necessary or expedient;

b. to execute all papers necessary in connection with any interference that may be declared concerning the Patent or any continuation, continuation-in-part, divisional, reissue or reexamination thereof and to cooperate with the Assignee in every way possible in obtaining evidence and going forward with such interference; and

c. to perform all affirmative acts and take all lawful oaths that may be necessary or required to obtain a grant of a valid patent to the Assignee on the Patent and on any continuation, continuation-in-part, divisional, reissue or reexamination of the Patent in any country, and for the procurement, maintenance, enforcement, and defense of Letters Patent or Patents for the inventions described and claimed therein, without charge to the Assignee, its successors, legal representatives, and assigns, but at the cost and expense of the Assignee, its successors, legal representatives, and assigns.

The Assignor hereby covenants that, at the time of execution and delivery of the present assignment, the Assignor is the sole and lawful owner of the entire right, title, and interest in and to the inventions set forth in the Patent identified above, and has the full and complete right, title, and interest to convey the entire interest herein assigned, and that it has not executed, and will not execute, any agreement in conflict therewith.

The Assignor has reviewed the documents in the Patent identified above and, to the best of Assignor's knowledge and belief, title is in the Assignor identified above.

I hereby declare that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true; and further, that these statements are made with the knowledge that willful false statements, and the like so made, are punishable by fine or imprisonment, or both, under Section 1001, Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the Patent, corresponding applications or any patent issuing thereon.
