ASSIGNMENT

For good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Anthony Oleszkiewicz, Brian Blickhan, and Mark B. Jones (hereinafter referred to as Assignors) assign to Fenwal, Inc. (hereinafter referred to as Assignee), a Delaware corporation, having a principal place of business at Three Corporate Drive, Lake Zurich, IL, 60047, its successors, legal representatives and assigns, the entire right, title and interest throughout the world: in Assignors' invention or improvement in Biological Fluid Filtration Systems And Methods, as described in the Application Serial No. 12/098,876 for Letters Patent of the United States therefore, and filed on April 7, 2008; in any and all other United States applications, regular and provisional, and applications in any and all countries which Assignors may file, either solely or jointly with others, on said invention or improvements; in any and all Letters Patent of the United States or of any other country which may be obtained on any of the said applications; if provisional, in any regular application referring thereto pursuant to 35 USC 119(e) or other internal priority legislation; in any division, continuation, reexamination, reissue or extension of any of the foregoing; and in any other application claiming priority thereto under any domestic, foreign, and/or international priority legislation or treaty.

Assignors hereby authorize and request the Commissioner of Patents and any other patent-granting authority to issue any domestic, foreign, and/or international Letters Patent on said invention or improvement to Fenwal, Inc.

Assignors warrant that they are the owners of the entire right, title and interest in and to the invention and patent application herein assigned and have the right to make this assignment; and further warrant that there are no outstanding prior assignments, licenses, or other rights whatsoever in the interest herein assigned.

For said considerations, Assignors hereby agree upon the request and at the expense of said Assignee, its successors, legal representatives and assigns, to execute any and all domestic, foreign, and/or international regular, divisional, continuation, and renewal applications for said invention or improvements, and any necessary oath or supplemental oath or affidavit relating thereto, and any application for the reissue or extension of any Letters Patent that may be granted upon said application or upon any

application claiming priority to said application that said Assignee, its successors, legal representatives and assigns may deem necessary or expedient.

For said consideration, Assignors further agree upon the request of said Assignee, its successors, legal representatives and assigns, in the event of said application, or any domestic, foreign, and/or international application claiming priority thereto, or any Letters Patent issued on said application or on an application claiming priority thereto, or any reissue or application for the reissue thereof becoming involved in Interference, Opposition, or any other contested matter to cooperate to the best of their ability with said Assignee, its successors, legal representatives and assigns in the matters of preparing and executing the preliminary statement or other such document and giving and producing evidence in support thereof. Assignors further agree to perform, upon such request, any and all affirmative acts to obtain said Letters Patent, and vest all rights therein hereby conveyed in the said Assignee, its successors, legal representatives and assigns whereby said Letters Patent will be held and enjoyed by the said Assignee, its successors, legal representatives and assigns to the end of the term for which said Letters Patent may be granted as fully and entirely as the same would have been held and enjoyed by Assignors if this assignment and sale had not been made.

For said consideration, and without limiting any of the above, Assignors also assign to said Assignee, its successors, legal representatives and assigns the entire right, title and interest in said invention or improvements for any and all foreign countries and the right of priority for patent and utility model applications in all countries arising under any applicable international convention for the protection of industrial property and/or any internal priority legislation of such countries, and Assignors agree upon the request of said Assignee, its successors, legal representatives and assigns to execute any and all documents that shall be required to be executed in connection with any and all applications for foreign Letters Patent thereof, including the prosecution thereof, and to execute any and all documents necessary to invest title in said foreign applications and patents in said Assignee.
