PATENT ASSIGNMENT

This Patent Assignment is made and entered into as of May 19, 2008, by and between Precision Products Group, Inc., a Delaware corporation ("Assignor"), and Michigan Spring & Stamping of Muskegon, LLC, a Michigan limited liability company ("Assignee").

WHEREAS, pursuant to the Asset Purchase Agreement between the Assignor and MS Acquisition Company, LLC, a Michigan limited liability company ("Buyer"), and Hines Corporation, a Michigan corporation, dated as of May 2, 2008 (the "Agreement"), Assignor has assigned all right, title and interest throughout the world to the patents and patent applications listed on the attached Schedule 1, and all inventions described and claimed therein (including divisionals, continuations-in-part, provisionals, reissues, reexaminations or interferences thereof) (collectively referred to as the "Patents");

WHEREAS, pursuant to the Agreement, the Buyer has acquired all right, title and interest in and to the Patents;

WHEREAS, pursuant to the Assignment and Assumption Agreement dated as of May 19, 2008 between Buyer and Assignee (the "Assignment"), Buyer assigned to Assignee and Assignee assumed all right, title and interest in and to the Patents, and the parties wish to record the acquisition by Assignee of the right, title and interest in and to the Patents in the U.S. Patent and Trademark Office and all other applicable international patent offices; and

NOW, THEREFORE, for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. Pursuant to the Agreement and Assignment, which are incorporated by reference as if fully set forth herein, Assignor hereby assigns to the Assignee all of Assignor's right, title and interest in and to the Patents including all proceeds therefrom and the right to bring an action at law or in equity for any infringement, dilution or violation of any of the Patents occurring prior to the date hereof, and to collect all damages, settlements and proceeds relating to the Patents.

2. This Patent Assignment may be executed simultaneously in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

3. This Patent Assignment is subject to all the terms and conditions of the Agreement. The parties intend that this Patent Assignment is for recordation purposes only and its terms shall not modify the applicable terms and conditions of the Agreement, which govern the parties' rights and interests in the Patents.
