WHEREAS, pursuant to an Asset Purchase and Technology Transfer Agreement dated September 6, 2005 (the "Agreement") (terms defined in the Agreement and not otherwise defined herein shall have the same meaning when used herein) by and between AMETEK, INC., a Delaware corporation (the "Purchaser") and QUIZIX, INC a California corporation ("Quizix"), and John Petro, an individual ("Petro") (Quizix and Petro shall be collectively referred to herein as "Sellers") providing, among other things, for the sale by Sellers to Purchaser of the Assets (as defined in the Agreement), other than the Excluded Assets, Sellers agreed to sell, convey, transfer, assign and deliver to Purchaser, its successors and assigns, all right, title and interest of Sellers in, to and under all patents and applications therefore used in the conduct of the Business, and, in this connection, on September 6, 2005 Sellers executed and delivered to Purchaser the Assignment of Patent Rights attached hereto as Exhibit A.

WHEREAS, on March 13, 2006, Sellers, together with co-inventors Donald Burch and Jeremy F. Mayer, executed and delivered to Purchaser the Amendment to Schedule of Assignment of Patent Rights, attached hereto as Exhibit B, which added U.S. Patent No. 7,004,446 entitled "Bistable Dual-Magnet Valve Unit" to the Schedule of Assigned Patents.

WHEREAS, Purchaser desires to obtain from Sellers and the co-inventors a confirmatory assignment for purposes of recording the prior transfer of interests with the U.S. Patent and Trademark Office.

NOW, THEREFORE, the undersigned, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound hereby, for themselves and their respective heirs, successors and assigns, hereby confirm that they have jointly and severally sold, assigned and transferred, and do hereby sell, assign and transfer, to Purchaser and its successors and assigns, all of the undersigned's right, title and interest in and to U.S Patent No. 7,004,446 and the inventions therein, including any divisions, continuations-in-part and reissues of said patent heretofore or hereafter granted on the applications for said patents together with all claims for damages by reason of past infringement of said patent, with the right to sue for, and collect the same for its own use and enjoyment, and for the use and enjoyment of its successors and assigns, the same to be held and enjoyed by Purchaser, its successors and assigns, to the full end of terms thereof.

The undersigned hereby expressly jointly and severally warrant to Purchaser that they have not heretofore encumbered the right, title or interest to said patent, and that said patent is not subject to any lien or claim, license, assignment, sale, agreement, royalty arrangement or dispute.

The undersigned jointly and severally agree, at any time and from time to time after delivery hereof, upon Purchaser's request, to do, execute, acknowledge and deliver, or to cause

to be done, executed, acknowledged and delivered, all such further acts, assignments, transfers, conveyances, powers of attorney and assurances as may be required for the better assigning, transferring, conveying and confirming to Purchaser, or to its successors and assigns, of, or for obtaining the benefits of, said patent.

Nothing herein contained shall be deemed to release Sellers in any way from any of their obligations under the Agreement other than those performed by this instrument or shall affect in any way the respective rights and obligations of Purchaser and Sellers as set forth in the Agreement.

This instrument shall be binding on the undersigned and their respective heirs, successors and assigns and shall inure to the benefit of Purchaser and its successors and assigns.
