CONFIRMATORY ASSIGNMENT OF PATENT RIGHTS

This **CONFIRMATORY ASSIGNMENT** is made as of the date set forth below from **Eric Liu**, residing at 2064 Kimberlin Place, Santa Clara, California 95051 ("**Assignor**") to **Bookham Technology plc**, a corporation organized under the laws of England and Wales f/k/a Ignis Optics, Inc. ("**Assignee**").

Whereas, as a condition of employment and for consideration received, Assignor entered into a Proprietary Information and Inventions Agreement (the "**PIAA**") with Ignis Optics, Inc., f/k/a PrimaLux Optics, Inc. (the "**Company**") providing that the Company owns all right, title, and interest in all proprietary information and inventions developed by Assignor during the course of his employment with the Company;

Whereas, during Assignor's course of employment with the Company, Assignor contributed to certain inventions, including, but not limited to, the inventions claimed in US Patent 7,059,887, entitled Optoelectric Module with Pop-out Tab Based Latching/Delatching Mechanism, issued June 13, 2006; and

Whereas, Assignee acquired the Company pursuant to an agreement and plan of merger that became effective on October 6, 2003;

Now Therefore, in order to give full effect to the PIAA, to fulfill Assignor's obligations that arose while he was employed by the Company, and in exchange for consideration duly received, the parties agree as follows:

Assignor hereby acknowledges and agrees that, pursuant to the PIAA and the conditions of his employment with the Company, Assignor sold, assigned, transferred, and set over, unto Assignee (and to the extent, if any, not provided for in the PIAA, Assignor hereby conveys, assigns, and transfers to Assignee), the entire right, title, and interest in all proprietary information and inventions, whether patentable or not, created during Assignor's employment with the Company, including all right, title and interest in, to, and under the patents set forth above, and all right, title, and interest in all patents and patent applications (U.S. and foreign) claiming filing priority thereto or to any parent patent applications, and including all divisions, continuations, renewals, substitutes, reissues, reexaminations, and extensions thereof, and any and all claims, demands, causes of action, damages and remedies of every kind recoverable at law or in equity from any and every party for any and every infringement (past, present, or future) of such patents and patent applications, together with the rights to bring and maintain any action for past, present, or future infringements and to recover proceeds (including, but not limited to, all license royalties, fees, and proceeds of infringement suits).
