ASSIGNMENT OF PATENT APPLICATION

WHEREAS, **EXXONMOBIL CHEMICAL PATENTS INC. ("EMCPI")**, is the owner of record of:

United States Patent Application No. 11/891,940, filed August 14, 2007

claiming priority to United States Patent Application No. 60/844,519, filed September 14, 2006; and

WHEREAS, **EMCPI**, for good and valuable consideration, receipt and sufficiency of which is hereby acknowledged assigns to **Symyx Technologies, Inc., ("Symyx")** an undivided joint ownership right, title, and interest in and to the invention and application, and to all foreign counterparts (including patent, utility model and industrial designs), and in and to any Letters Patent and Registrations which may hereafter be granted on the same in the United States and all countries throughout the world, and to claim the priority from the application as provided by the Paris Convention (collectively, the "Patent Assets"). The undivided joint right, title, and interest is to be held and enjoyed by **Symyx** and **Symyx's** successors and assigns as fully and exclusively as it would have been held and enjoyed by **EMCPI** had this assignment not been made, for the full term of any Letters Patent and Registrations which may be granted thereon, or of any division, renewal, continuation in whole or in part, substitution, conversion, reissue, prolongation or extension thereof; provided, however, that **EMCPI** reserves for itself an undivided joint ownership right, title, and interest in the Patent Assets and provided that this assignment of such undivided joint right, title, and interest to **Symyx** is subject to those licenses, rights and obligations set forth in the Alliance, Technology Transfer, and License Agreement effective April 1, 2003, between **Symyx Technologies, Inc., Symyx Discovery Tools, Inc. and ExxonMobil Research and Engineering Company**.

IN TESTIMONY WHEREOF, Assignor has signed this document on the date(s) indicated below.
