ASSIGNMENT OF PATENT RIGHTS

In consideration of good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the undersigned Assignor hereby assigns to:

**CANCER ADVANCES, INC., 4364 South Alston Avenue, Durham, North Carolina
("Cancer Advances")**

its successors, legal representatives, and assigns, the entire right, title and interest in and to all patents and patent applications listed in Exhibit A attached hereto (the "Patents" and "Patent Applications", respectively).

The undersigned Assignor acknowledges that it has assigned, and transferred, and by these presents does hereby assign, and transfer, to Cancer Advances, its successors, legal representatives, and assigns, the entire right, title, and interest, throughout the world, in, to, and under all inventions disclosed in the Patents and Patent Applications, and in and to the Patents and Patent Applications, and all Patents that may be granted thereon, and all divisions, continuations, continuation-in-parts, reissues, reexaminations, renewals, extensions thereof and letters patent which may be granted thereon, and all rights of all kinds, including an assignment of all rights under the provisions of the Patent Cooperation Treaty, in all countries throughout the world, and in and to any and all applications which have been or shall be filed in any foreign countries for letters patent on the said inventions, including the right to file national and regional patent applications directly in the name of Cancer Advances and to claim for any such applications any priority rights to which such applications are entitled under the Patent Cooperation Treaty of 1970 or any other international conventions or treaties, and all applications for letters patent that may hereafter be filed for said subject matter or for Patents and Patent Applications in any country or countries foreign to the United States.

The undersigned Assignor hereby authorizes and requests the United States Commissioner for Patents, and any official of any country foreign to the United States, whose duty it is to issue patents on applications, to issue all letters patent for the subject matter, as well as all Patents resulting from the Patent Applications, to the Cancer Advances, its successors, legal representatives, and assigns, in accordance with the terms of this agreement.

The undersigned Assignor assigns, transfers, and conveys to Cancer Advances, its successors, legal representatives, and assigns all claims for damages and all remedies arising out of any violation of the rights assigned that may have accrued prior to the date of assignment or that may accrue hereafter, including, but not limited to, the right to bring suit for, collect and retain damages for past infringements of the issued letters patent.

The undersigned Assignor warrants to be the owner, or a legal representative of the owner, of the entire right, title and interest in the subject matter and to have the right to make this assignment and further warrants that there are no outstanding prior assignments, licenses, or other encumbrances on the interest herein assigned.

For said considerations the undersigned Assignor hereby agrees, upon the request and at the expense of Cancer Advances, its successors and assigns, to execute any and all

divisional, continuation and substitute applications for said inventions, Patents and Patent Applications, and any necessary oath, affidavit, or declaration relating thereto, and any application for the reissue or extension of any letters patent that may be granted upon any Patent Application, and any and all applications and other documents for letters patent in foreign countries on said inventions, that Cancer Advances, its successors or assigns may deem necessary or expedient, and for the consideration, the undersigned Assignor authorizes Cancer Advances, to apply for patents for said inventions and Patent Applications in its own name in such countries where such procedure is proper and further agrees, upon the request of Cancer Advances, its successors and assigns, to cooperate to the best of the ability of the undersigned Assignor with Cancer Advances, its successors and assigns, in any proceedings or transactions involving such applications or patents, including the preparation and execution of the preliminary statements, giving and producing evidence, and performing any and all other acts necessary to obtain, maintain and enforce said letters patent, both United States and foreign, and vest all rights therein hereby conveyed in Cancer Advances, its successors and assigns, whereby said letters patent will be held and enjoyed by Cancer Advances, its successors and assigns, to the full end of the term for which said letters patent will be granted, as fully and entirely as the same would have been held and enjoyed by the undersigned Assignor if this assignment had not been made.
