Examiner's first report on patent application no. 2006203533
by Wayne-Dalton Corp.

Last proposed amendment no.

Dear Madam/Sir,

I am replying to the request for normal examination. I have examined the application and I believe that there are lawful grounds of objection to the application. These grounds of objection are:

1. The invention defined in claims 1 to 12 are not novel (and do not involve an inventive step) when compared with the following prior art document that discloses all the essential features of the invention claimed: US 3427521 and US 5510686. Both these citations are directed to automatic garage door openers with screw in light globes activated by a remote source.
2. The invention defined in claims 6, 11 and 12 are not novel (and do not involve an inventive step) when compared with the following prior art document that discloses all the essential features of the invention claimed: US 4954810. This citation is directed to an automatic garage door opener which activates a voice synthesizer rather than a light.

NOTE: There is a current postponement of acceptance in place. If you overcome all other objections before the expiration of that postponement, the Commissioner will only accept the application at that time if you have filed a clear and unambiguous statement requesting the withdrawal of that postponement. Otherwise, a further adverse report will be issued.

^e
You have 21 months from the date of this report to overcome all my objection(s) otherwise your application will lapse.

You will need to pay a monthly fee for any response you file after 12 months from the date of the first report.

You will also need to pay any annual continuation fees that apply. These will normally be first due five years from the filing date. Please note however that earlier commencement dates apply for divisional applications.

Information about fees may be obtained by phoning 1300 651 010.

Yours faithfully,

RON WEBER
