PATENT ASSIGNMENT

This Patent Assignment (this "Assignment") is made and entered into as of May 7, 2009 by Curry Co, LLC, a New York limited liability company ("Assignor"), in favor of LedgeTech International Corporation, a Delaware corporation ("Assignee"). Capitalized terms used but not defined herein have the meanings assigned to them in the Intellectual Property Assignment Agreement dated as of May 7, 2009 (the "IP Assignment Agreement") between Assignor, Assignee and the other parties thereto.

Pursuant to the IP Assignment Agreement, Assignor has agreed to assign, convey and transfer to Assignee all of its right, title and interest in and to certain intellectual property including, without limitation, the patents and patent applications listed on Schedule 1 attached hereto (the "Patents").

The parties wish to execute this Assignment for purposes of transferring the Patents pursuant to the IP Assignment Agreement and filing this Assignment with the United States Patent and Trademark Office and all applicable foreign intellectual property offices, as may be necessary to effectuate the assignment and transfer of the Patents to Assignee.

In consideration of the promises and the mutual representations, warranties, covenants and agreements contained herein, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the parties agree as follows:

1. Assignor hereby assigns, conveys and transfers to Assignee all of its right, title and interest in and to (a) each of the Patents throughout the world, (b) all applications and issuances throughout the world for the Patents, (c) the inventions as described in the specifications of the Patents, and (d) the right to sue and recover for, and the right to the profits or damages due or accrued arising out of or in connection with any and all past, present or future infringements or damage or injury to the Patents.
2. Assignor hereby acknowledges and agrees that from and after the date hereof, Assignee shall be the exclusive owner of all of Assignor's right, title and interest in and to the Patents.
3. As further set forth in the IP Assignment Agreement, Assignor shall, at Assignee's reasonable request, take such further action and execute such additional agreements and instruments as may be necessary to effect the assignment contemplated hereby and to perfect Assignee's title in and to the Patents. In addition, Assignor shall provide Assignee and its successors, assigns and legal representatives reasonable cooperation and assistance, at Assignee's request and sole cost and expense, in the prosecution or defense of any proceeding that may arise in connection with any of the rights assigned hereby.
