ASSIGNMENT

THIS ASSIGNMENT is made and entered as of May 27, 2009 ("Effective Date") by and between Timothy S. Nichols residing at 1123 Sea Creek Landing, Annapolis, MD 21403 ("Assignor") and Warrior Sports, Inc., and all of its predecessors, having a place of business at 32125 Hollingsworth Avenue, Warren, Michigan 48092 ("Assignee").

Assignor was a named inventor on U.S. Patent 5,957,791 and titled IMPROVED LACROSSE STICK HEAD WITH UPPER STRING HOLES AND METHOD FOR STRINGING SAME, which issued on September 28, 1999. The parties believe that the Assignor previously signed an assignment which assigned the rights in the inventions in the assigned patent to the predecessors of Warrior Sports, Inc., namely Sports Licensing, Inc., which transferred the assigned patent to Brine, which subsequently merged with Warrior Sports, Inc. That previous assignment is not presently locatable. The Assignee has therefore requested the Assignor to confirm assignment of the assigned patent to Assignee by the Assignor for purposes of providing notice to the public of its ownership.

Accordingly, the parties agree as follows:

Assignor hereby confirms that as of at least September 28, 1999, for good and valuable consideration, the Assignor irrevocably sold, assigned and transferred to Assignee, Assignee's predecessors and Assignee, the Assignor's entire right, title and interest in and to the assigned patent, as well as any inventions claimed, described or shown therein.

Assignee makes no representations or warranties of any kind, express or implied, with respect to products made under the assigned patent under this agreement, including without limitation, no warranties of merchantability, non-infringement, or fitness for a particular purpose; and in no event will Assignor be liable to Assignee or any third party for any consequential, incidental, punitive or indirect damages of any kind arising out of this agreement or Assignee's past, present or future exploitation of the assigned patent or products produced thereunder.

Assignee agrees to defend, indemnify and hold harmless Assignor against and in respect of any and all damages, losses, liabilities, claims and expenses, including without limitation attorney fees caused by or arising out of any product liability claim due to a manufacturing or design defect in any product sold by Assignee constructed in accordance with the assigned patent.

The parties, intending to be legally bound, have executed this Assignment as set forth below.
