This assignment made on the date below by inventor Stephen G. Baker, a citizen of the United States and resident of Goleta, California ("Assignor"), to IChange, Inc., a California corporation with offices in Goleta, California ("Assignee");

WHEREAS, Assignor has invented a new, original and useful invention entitled Protective Garment ("the Invention"), for which the following patent matters have been filed with the United States Patent and Trademark Office, further identified by Cisló & Thomas' Docket Numbers listed below (collectively, "the Patent Matters"):

Issued U.S. Patent No. 7,228,858 (Cisló & Thomas LLP Docket No. 05-14582);

Pending U.S. Patent Application Serial No. 11/799,527 (Cisló & Thomas LLP Docket No. 07-19219); and

Pending U.S. Patent Application Serial No. 12/011,243 (Cisló & Thomas LLP Docket No. 07-20435).

WHEREAS, Assignor believes himself to be the original, first, and sole inventor of the Invention disclosed and claimed in the Patent Matters; and

WHEREAS, Assignee desires to acquire by formal, recordable assignment their entire right, title, and interest in and to the Invention, the Patent Matters, and any provisional, non-provisional, divisional, continuation, continuation-in-part, reissue, foreign, or other application based on the Invention, in the United States and throughout the world.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby sells, assigns, and transfers to Assignee, his entire right, title, and interest in and to the Invention and the Patent Matters for the Invention in the United States and throughout the world, including the exclusive right to file any provisional, non-provisional, divisional, continuation, continuation-in-part, reissue, foreign, or other application based on the Invention directly in the name of Assignee and to claim any priority rights to which such applications are entitled under international conventions, treaties, or otherwise.

Further Assignor agrees that, upon request and without further compensation, but at no expense to Assignor, he and his legal representatives and assigns will do all lawful acts, including the execution of papers and the giving of testimony, that may be necessary or desirable for obtaining, sustaining, reissuing, or enforcing the Patent Matters in the United States and throughout the world for the Invention, and for perfecting, recording, or maintaining the title of Assignee, its successors and assigns, to the Invention, and the Patent Matters concurrently filed herein, and any patents granted for the Invention in the United States and throughout the world.

Assignor represents and warrants that he has not granted and will not grant to others any rights inconsistent with the rights granted herein.

Assignor authorizes and requests the Commissioner of Patents and Trademarks of the United States and of all foreign countries to issue any Patent granted for the Invention, whether on the Patent Matters, or on any subsequently filed provisional, non-provisional, divisional, continuation, continuation-in-part, reissue, or other application, to Assignee, its successors and assigns, as the assignee of Assignor's entire interest in the Invention.
