ASSIGNMENT

The undersigned inventor (hereinafter "Assignor") of the residence indicated below has invented a **PILLOW BLOCK BEARING FOR SHAFT DRIVEN CONVEYOR SYSTEM WITH SELF ALIGNING FEATURE** (hereinafter the "Invention"). Several embodiments of the Invention are disclosed in the United States Utility Patent Application **Serial No. 12/233,995**, filed September 19, 2008, and United States Provisional Patent Application **Serial No. 60/974,311**, filed September 21, 2007, under the same title (hereinafter the "Applications").

OCS INTELITRAK, INC., an Ohio corporation duly organized and existing under the laws of the State of Ohio, having a principal place of business at 483 Northland Boulevard, Cincinnati, Ohio 45240, and its successors, assigns, and legal representatives (hereinafter the "Assignee"), desires to secure the entire right, title and interest in and to the Invention.

For One Dollar (\$1.00) in hand paid, and other good and valuable consideration, the receipt and adequacy of which is acknowledged, Assignor hereby:

1. Sells, assigns and transfers to Assignee the entire right, title and interest in and to the Invention, the Applications, any other applications to which the Applications claim priority benefit, including but not limited to related provisional applications, any other patent applications based in whole or in part upon the Invention or Applications in any country (including divisional, renewal, substitute, continuation, and continuation-in-part applications), and all patents which may be granted thereon (including all reissues, reexaminations, and extensions thereof);
2. Authorizes Assignee to file patent applications on the Invention in any country in the name of Assignee, or otherwise as Assignee may deem advisable;
3. Authorizes and requests the Director of the United States Patent & Trademark Office, and such patent office officials in foreign countries as are duly authorized by their laws to issue patents, to issue any patents on the Invention to Assignee as the owner of the entire right, title, and interest therein or otherwise as Assignee may direct;
4. Agrees, without expense to Assignor but without further consideration, to carry out in good faith the intent and purpose of this Assignment by executing all divisional, renewal, substitute, continuation, continuation-in-part, reissue, and all other patent applications based on the Invention; executing all rightful oaths, assignments, powers of attorney and other papers; communicating to Assignee all facts known to Assignor relating to the Invention and the history thereof; and generally, doing everything reasonably possible which Assignee shall consider desirable for aiding in securing, maintaining, and enforcing proper protection for the Invention and for vesting title in Assignee to the Invention and all patent applications and patents based on the Invention;
5. Represents and warrants that Assignor has the full right to convey to Assignee the entire interest to the Invention, and that Assignor has not executed, and will not execute, any agreement in conflict herewith;

6. Agrees to transfer a like interest upon request of Assignee, and without further remuneration, in and to any improvements growing out of or relating to the Invention or any patent applications or patents based thereon;

7. Authorizes Assignee to insert in this Assignment the serial numbers and filing dates of the Applications or any other information which may be necessary or desirable in order to comply with the rules of the United States Patent and Trademark Office for recordation of this Assignment; and

8. Covenants that this Assignment shall be binding upon Assignor's heirs, successors, and legal representatives.

Assignor/Inventor:

Signature: Charles P. Tabler Date: 9/10/09
Full Name: Charles P. Tabler
Residence: 7299 Southwind Terrace
