## PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (this "Assignment") is effective November 16, 2007 ("Effective Date"), by and between, Rockford Products Corporation, an Illinois corporation ("Assignor"), and Rockford Acquisition, LLC, a Delaware limited liability company ("Assignee").

WHEREAS, Assignor wishes to assign to Assignee, and Assignee wishes to obtain from Assignor, the United States patents set forth on Schedule A attached hereto, together with all associated patent rights to the inventions disclosed therein (collectively, the "Patents").

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby assigns to Assignee its entire right, title and interest in and to the Patents, including, without limitation, any United States continuations, divisions, continuations-in-part, reissues, reexaminations, extensions, and including the subject matter of all claims that may be obtained therefrom, and all other corresponding rights that are or may be secured under the laws of the United States, now or hereafter in effect, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made, together with all income, royalties, damages or payments due or payable as of the Effective Date and thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Patents, with the right to sue for, and collect the same for its own use and enjoyment, and for the use and enjoyment of its successors, assigns, or other legal representatives.

Assignor hereby authorizes and requests the U.S. Director of Patents and Trademark Office to record Assignee as owner of each of the Patents.

Assignor shall take all further actions, and provide to Assignee, Assignee's successors, assigns or other legal representatives, all such cooperation and assistance (including, without limitation, the execution and delivery of any and all affidavits, declarations, oaths, exhibits, assignments, powers of attorney or other documentation), requested by Assignee to more fully and effectively carry out the purposes of this Assignment, including, without limitation, with respect to the following: (1) the preparation and prosecution of any applications relating to any of the rights assigned herein; (2) the prosecution or defense of any interference, opposition, reexamination, reissue, infringement or other proceedings that may arise in connection with any of the rights assigned herein, including, without limitation, testifying as to any facts relating to the Patents and this Assignment; (3) obtaining any additional patent protection relating to any of the rights assigned herein that Assignee may deem appropriate that may be secured under the laws now or hereafter in effect in the United States; and (4) the implementation or perfection of this Assignment in the United States.

Assignor represents and warrants that Assignor has the full right to convey the entire interest of the invention and the applications and has not granted any rights inconsistent with the rights granted in this Assignment.
