Assignment

I, the undersigned inventor of the invention claimed in US Patent 7,046,166 ("Patent", titled "Modular wireless integrated network sensor (WINS) node with a dual bus architecture", and filed April 29, 2003 as application 10/426407), and a former employee of Teledyne Scientific & Imaging, LLC (previously known as Rockwell Scientific Company, LLC) hereby sell, assign, transfer and set over to TS&I all my right, title, and interest in the aforesaid Patent, and any inventions claimed in (a) said Patent, (b) any PCT and foreign counterpart patents and patent applications of said Patent, (c) any reissue or reissues of said Patent already granted and which may be granted, and (d) any certificates of reexamination already granted and which may be granted, the same to be held and enjoyed by TS&I for its own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, to the end of the term or terms for which said Patent are or may be granted, reissued or extended as fully and entirely as the same would have been held and enjoyed by me if this assignment and sale had not been made; together with all claims for damages by reason of past, current, and future infringement and/or provisional rights under said Patent, with the right to sue for, and collect the same for its own use and behalf, and for the use and behalf of its successors, assigns or other legal representatives.

In witness whereof, I have executed this assignment.
