Circuits and Methods Representative of Spike Timing Dependent Plasticity of Neurons

described in a PCT patent application, identified as Attorney Docket No. MIT-201AWO, at Daly, Crowley, Mofford & Durkee LLP, Suite 301A, 354A Turnpike Street, Canton, Massachusetts 02021 and filed on August 25, 2009, as Application Serial No. PCT/US09/54881, and the invention(s) and improvement(s) set forth therein, and (ii) said provisional patent application, any patent application claiming the benefit thereof, and any and all continuations, continuations-in-part, divisionals, and renewals of and substitutes for said patent application, and (iii) all the rights and privileges under any and all patents that may be granted therefor in any country, and any reissues, or reexaminations, or extensions of said patents. I agree that, when requested, I will, without charge to said Assignee but at its expense, sign all papers, take all rightful oaths, and do all acts that may be necessary, desirable or convenient for securing and maintaining patents for said inventions in any and all countries and for vesting title thereto in said Assignee, its successors, assigns and legal representatives or nominees.

I authorize and empower said Assignee, its successors, assigns and legal representatives or nominees, to invoke and claim for any application for patent or other form of protection for said inventions filed by it or them, the benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, and to invoke and claim such right of priority without further written or oral authorization from me.
