PATENT ASSIGNMENT

This Patent Assignment (this "Assignment") is made from Applied Minds, Inc., a Delaware corporation (the "Assignor"), to Applied Proteomics, Inc., a Delaware corporation (the "Assignee").

The Assignor desires to assign to the Assignee all of the Assignor's right, title and interest in and to the patent applications and any and all divisional applications, continuing or continuation-in-part applications, or reissue patents related thereto or based thereon, any and all patents issuing thereon, and any and all foreign patents and patent applications corresponding thereto or relying thereon for its filing or convention date (the "Patents") set forth on Exhibit B to the Intellectual Property Transfer Agreement entered into as of January 9, 2008 (the "Agreement"). The Patents are further detailed in Exhibit A attached hereto.

In consideration for the Assignee's obligations under the Agreement and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Assignor does hereby sell, assign, transfer, convey and deliver to the Assignee all of the Assignor's right, title and interest in and to the Patents, including all common law rights therein, applications to register therefor and all claims for damages by reason of past infringements of the Patents with the right to sue for and collect the same for its own use and benefit, and for the use and on behalf of its successors, assigns and other legal representatives. The Assignor authorizes the Commissioner of Patents and Trademarks of the United States of America and the empowered officials of all other governments to issue or transfer all such patents and patent applications to the Assignee, as assignee thereof, or otherwise as the Assignee may direct.
