PATENT ASSIGNMENT

For valuable consideration, each of the following inventors, Dipl.-Ing. Jan Schoppmeier, Dipl.-Ing. Rolf Sundermann, Dipl.-Ing. Holger Purol, and Prof. Dr.-Ing. Axel Herrmann, formally assigns to Airbus Operations GmbH¹, a German corporation having a place of business at Kreetzlag 10, 21129 Hamburg, Germany ("Airbus"), his entire right, title and interest throughout the world in the invention and improvements that are the subject of United States Patent Application No. 61/104,053, filed October 9, 2008 entitled, "Device and Method for Draping and Pre-Shaping Curved Profiled Structural Components of Fiber Materials" and German Application No. DE 10 2008051121.8, filed October 9, 2008 ("the German priority application"), to the extent such patent rights are not already owned by Airbus, by operation of law.

The inventor also acknowledges that the German priority application was filed with his knowledge and consent, and by his legal representatives or assigns, so as to entitle this U.S. patent application to the benefit of the priority claim to the German priority application under 35 U.S.C. §119. This Assignment document applies to this U.S. application, and to any and all other U.S. continuing applications based thereon ("any related U.S. application").

To fully effectuate this Assignment, the inventor agrees to cooperate with Airbus, as deemed reasonably necessary by Airbus, to assist in prosecuting this U.S. application or any related U.S. application. Furthermore, providing such assistance shall not entitle the inventor to extra compensation, other than compensation which the inventor may already be entitled to under applicable law other than U.S. law.
