PATENT ASSIGNMENT

For valuable consideration, each of the following inventors, Martin Schmid, Dariusz Krakowski, Michael Markwart, and Joerg Baumann, formally assigns to Airbus Operations GmbH¹, a German corporation having a place of business at Kreetzlag 10, 21129 Hamburg, Germany ("Airbus"), his entire right, title and interest throughout the world in the invention and improvements that are the subject of United States Patent Application No. 61/142,420, filed January 5, 2009 entitled, "Aircraft Air-Conditioning System With A Reduced Risk Of Icing" and German Application No. DE 10 2009 003 937.6, filed January 5, 2009 ("the German priority application"), to the extent such patent rights are not already owned by Airbus, by operation of law.

Each of the inventors also acknowledges that the German priority application was filed with his knowledge and consent, and by his legal representatives or assigns, so as to entitle this U.S. patent application to the benefit of the priority claim to the German priority application under 35 U.S.C. §119. This Assignment document applies to this U.S. application, and to any and all other U.S. continuing applications based thereon ("any related U.S. application").

To fully effectuate this Assignment, the inventors agree to cooperate with Airbus, as deemed reasonably necessary by Airbus, to assist in prosecuting this U.S. application or any related U.S. application. Furthermore, providing such assistance shall not entitle the inventors to extra compensation, other than compensation which the inventor may already be entitled to under applicable law other than U.S. law.
