1. The Inventors hereby assign without limitation to the Assignee for the territory of the United States of America and the entire world his entire right, title, and interest in and to the Invention, Patent Application, and the Patents, including all divisionals, continuations, continuations-in-part, renewals, reissues, or substitute applications, and also including all priority rights for patent applications foreign to the United States of America. 2. The Inventors hereby covenant and agree, for themselves and their legal representatives, that they will:
