(hereafter referred to as "**the Company**" or "**Assignor**"), is a Delaware limited liability company having a place of business at 555 Constitution Drive, Taunton, Massachusetts 02780, and is the owner of inventions disclosed in the attached Schedule A, including any subsequently filed utility applications, which claim priority to the inventions disclosed in the attached Schedule A, including any renewals, revivals, reissues, reexaminations, extensions, continuations and divisions thereof and any substitute applications therefor, (hereafter referred to as "**the Patent Application(s)**").

Paul.R. Kateman (hereafter referred to as "**the Inventor**" or "**Assignee**") is an individual residing at 9 Waring Road, Natick, Massachusetts 01760, and is an inventor named in the Patent Applications. In a previously executed Assignment, the Inventor assigned rights, including rights (hereafter referred to as "**Reserved Rights**") to inventions by the Inventor that are disclosed in the Patent Application(s) and that are *outside* the Field of Interest of the Company, wherein the "**Field of Interest of the Company**" is defined to mean the design, manufacture, distribution, or sale of equipment or raw materials for the preparation on demand of ice cream, other frozen dessert products, partially frozen dessert products or frozen or partially frozen beverages and includes, without limitation, the use of equipment with a confined turbulence passage for mixing liquids and liquids and/or liquids and fluids to create blended and/or aerated food or beverage products which may subsequently be chilled and/or frozen or partially frozen with a thin layer chilling and/or freezing surface, provided that such turbulent mixing and such freezing methods may be independent of each other.

For good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and subject to the exception noted below, the Company hereby assigns the Reserved Rights back to the Inventor.

*Except*, the Company retains--with respect to any inventions in the Patent Application(s) that are not in the Field of Interest of the Company but which the Company reasonably determines may be useful to the Company in its Field of Interest and which were invented, alone or jointly, by the Inventor--a royalty-free, fully paid up, exclusive, perpetual and irrevocable *license* in the Field of Interest of the Company throughout the world to use, modify, create derivative works from, disclose, publish, translate, reproduce, deliver, perform, and dispose of such inventions and to authorize others so to do.

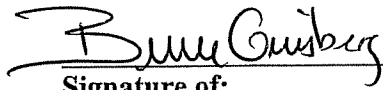

The Company, and its successors and assigns, agree at any time to execute and to deliver upon request of the Inventor such additional documents, if any, as are necessary or desirable and otherwise to do that which is necessary to give full effect to and to perfect the rights of the Inventor under this Assignment, including the execution, delivery and procurement of any and

all further documents evidencing this assignment, transfer and sale as may be necessary or desirable.

The Company hereby covenants that no assignment, sale, agreement or encumbrance has been or will be made or entered into which would conflict with this assignment.
