ASSIGNMENT

WHEREAS, as one of the below named inventors, I (hereinafter the "Undersigned") have invented certain new and useful inventions and improvements in Extremely Stretchable Electronics, for which an application for a United States Patent was filed on November 12, 2009 and bears Application Number 12/616,922, and for which an international patent application was filed under the Patent Cooperation Treaty on November 12, 2009 bearing Application Number PCT/US09/64199 (hereinafter the "Applications").

AND, WHEREAS, MC10, Inc., a corporation of the State of Delaware having a place of business at 36 Cameron Avenue, Cambridge, MA 02140, (hereinafter the "Assignee"), desires to acquire each of the Undersigned's entire right, title, and interest in and to said Applications and the inventions and improvements therein disclosed.

NOW, THEREFORE, for good and valuable consideration paid to each of the Undersigned by said Assignee, the receipt and sufficiency of which are hereby acknowledged, the Undersigned, as one of the inventors, does hereby irrevocably assign, sell and transfer unto said Assignee (and its successors and assigns) his or her entire right, title and interest in and to said Applications and the inventions and improvements disclosed therein for the United States and all foreign countries and any Letters Patent which may issue therefor in the United States and all foreign countries, and all applications resulting therefrom, including any and all conversions, divisions, reissues, continuations, continuations-in-part, substitute applications, reexaminations, renewals and/or extensions thereof, and all resulting patents in any jurisdiction worldwide. Such assignment extends to the full ends of the terms of these applications and patents as fully and entirely the same as would have been held and enjoyed by the Undersigned had this Assignment not been made. Said entire right, title, and interest referred to above includes all rights to all past, present and future claims for infringement of any patent resulting from said Applications, whether known or unknown, now existing or hereafter arising, including the right to grant licenses, to bring lawsuits and to recover damages for any past, present, or future infringement.

Each of the Undersigned represents and warrants as to himself or herself, as applicable, that he or she (a) is a lawful owner of said Applications and the inventions and improvements disclosed therein, (b) has the full right and power to convey to Assignee his or her entire interest (both legal and equitable) in and to said Applications and the inventions and improvements disclosed therein free and clear from all prior assignments, agreements, licenses, mortgages, security interests and other encumbrances whatsoever, and (c) has not granted any license in or to said Applications or the inventions and improvements disclosed therein or sold, assigned or transferred all or any part of the same.

And for the consideration aforesaid, and without any further payment or compensation by said Assignee or its successors and assigns, the Undersigned agrees to communicate to said Assignee or its representatives, agents, successors and assigns, any facts known to the Undersigned relating to said Applications and inventions and improvements disclosed therein, including evidence for interference purposes or for other legal proceedings, whenever requested, and will, upon request but without expense to the Undersigned, testify in any legal proceedings, execute and deliver all lawful papers deemed necessary by the Assignee to make the foregoing provisions effective, including the execution and delivery of all divisional, reissue, continuation, continuation-in-part, renewal and/or extension applications, make all rightful oaths, and generally do all other and further lawful acts deemed necessary or expedient by said Assignee or by counsel for said Assignee to assist or enable said Assignee to obtain and enforce full benefits from the rights and interests herein assigned and to secure, obtain and enforce proper patent protection for the assigned Applications and inventions and improvements disclosed therein in this or any foreign country.
