**PATENT ASSIGNMENT**

The undersigned, own all right, title, and interest in the invention entitled "METABOLITES AND DERIVATIVES OF AMBRISANTAN" (hereinafter referred to collectively as Assignor), which is the subject of a United States application for patent (hereinafter, "Application").

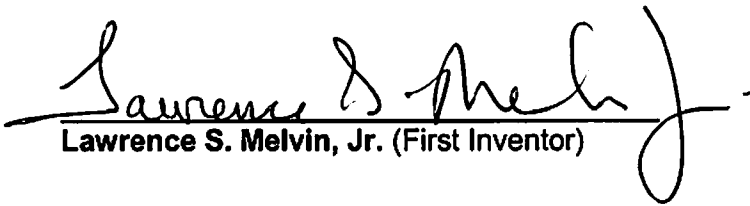

**WHEREAS**, Assignor desires to assign all right, title, and interest in and to the Application, to Gilead Colorado, Inc., having an address of 3333 Walnut Street, Boulder, Colorado 80301 and Abbott GmbH & Co. KG, having an address of Max-Planck-Ring 2, Wiesbaden, Germany 65205 (hereinafter referred to collectively as "Joint Assignees");

**WHEREAS**, Joint Assignees are desirous of acquiring all right, title, and interest in and to the Application.

**NOW, THEREFORE**, for good and valuable consideration, the receipt and adequacy whereof are hereby acknowledged, Assignor agrees to assign, and hereby does assign, unto Joint Assignees and their successors in interest, the full and exclusive right, title and interest in the United States of America and all foreign countries, including the right to claim priority under the laws of the United States, the Paris Convention, and any foreign countries, to the said invention as described in the aforesaid application, said application for patent, all divisions, continuations, reissues, and reexaminations, and all Letters Patent therefor to be held and enjoyed by Joint Assignees to the full end of the term for which said Letters Patent are granted and any extensions thereof as fully and entirely as the same would have been held by Assignor had this assignment and sale not been made, and the right to recover for past infringements of, or liabilities for, any of the rights relating to any of said applications or patents resulting therefrom.

Assignor represents that at the time of execution of this Patent Assignment, Assignor is the owner of all right, title, and interest in and to the Application, and that Assignor has not assigned, transferred, licensed or encumbered Assignor's rights therein, and that Assignor will not hereafter assign or attempt to assign any rights therein, or take any other action inconsistent with this Patent Assignment.

Assignor agrees to execute such further documents and take such acts as reasonably required by Joint Assignee or Joint Assignees' successor to secure and enforce Joint Assignees' rights in the Application, including but not limited to further assignments.
