The undersigned Inventor(s), in recognition of his or her (their) obligation as employee(s) of the Contractor to assign inventions to the Contractor, and pursuant to the obligations of the Contractor to the Government under the above contract, hereby assigns (assign) to the United States of America subject to a nonexclusive and royalty-free license which is hereby reserved to the Contractor, all right, title and interest in and to each invention disclosed and/or claimed in the above U.S. patent application.

The license reserved to the Contractor shall extend to all existing and future associated and affiliated companies, if any, within the corporate structure of which the Contractor is a part and shall be assignable to the successor of that part of the Contractor's business to which such invention pertains.

The Inventor(s) further agrees (agree) to assist the Contractor, and the Government, upon request, by furnishing any available information and documentation, and by performing all acts and doing all things which may be reasonably necessary to make this assignment effective.

The Contractor joins in and agrees to the following assignment, and except for the above reservation of a license relinquishes and assigns all right, title and interest in and to such invention and further agrees to furnish to the United States of America upon request any available information and documents necessary for the prosecution or the above-identified application for patent (including prosecution and settlement of interferences) and any substitution division, continuation-in-part or continuation of such patent application and any application for reissue of any patent resulting from such patent application.
