**AFFIDAVIT
AND
NUNC PRO TUNC ASSIGNMENT**

I, Barry Milliner, believe that I am NOT a co-inventor of the subject matter of United States Patent Number 7,152, 640 (attached hereto as Attachment A) invented by Larry L. Williams. My contribution was the supply of certain metal component, which I had built for Mr. Williams in accordance with the requirements provided to me by Mr. Williams. I am of the understanding that Mr. Williams had plans to use the component in constructing his inventive tree cutting attachment for a skid loader. Mr. Williams provided payment for the work I did on October 27, 2002, via Mr. Williams' check number 1996.

During the fall of 2002, I also recall having conversations with Mr. Williams regarding different techniques for transferring the rotational speed and torque from a hydraulic motor that Mr. Williams had identified, to the saw blade. I had suggested looking into load adapters as one possibility, as they were well known at the time, and might fit his needs, I did no more than merely explaining to Mr. Williams, well-known concepts of how load adapters worked, and provided Mr. Williams with a web site where he could select an appropriate sized load adaptor for purchase and evaluation.

However, if in the future it is determined that I am a co-inventor of any of the subject matter of United States Patent Number 7,152, 640, I hereby assign to Mr. Larry L. Williams, any and all of my rights, title and interest in and to any and all of the subject matter of United States Patent Number 7,152, 640, with the effective date of the assignment of October 27, 2002.
