ASSIGNMENT OF PATENT RIGHTS

THIS PATENT ASSIGNMENT (this “**Patent Assignment**”) is made and entered into as of March 19, 2010 (“**Effective Date**”) by and between Ciena Luxembourg S.a.r.l., a Société à responsabilité limitée organized under the laws of the Grand Duchy of Luxembourg having a share capital of USD 20,000 having its registered office at 560A, rue de Neudorf, L-2220, Luxembourg, Grand-Duchy of Luxembourg, registered with the Luxembourg Trade and Companies Register under number B 150984. (“**Assignor**”), and Ciena Corporation, a corporation incorporated under the laws of the State of Delaware having its executive offices at 1201 Winterson Road, Linthicum, Maryland 21090 (“**Assignee**”).

WHEREAS, Nortel Networks Limited, a corporation incorporated under the laws of Canada (“**NNL**”) and certain of its affiliates, on the one hand, and Assignee and certain of its affiliates, including Assignor, on the other hand, entered into an amended and restated asset sale agreement dated as of November 24, 2009, as amended from time to time (the “**Asset Sale Agreement**”) and certain ancillary agreements pursuant to which, among other things, NNL assigned to Assignor, among other assets, NNL’s entire right, title and interest in and to the United States patents and patent applications set forth on Schedule A attached hereto (collectively, the “**United States Assigned Patents**”), as well as certain other patents and patent applications issued by or registered with other countries and jurisdictions;

WHEREAS, Assignor and Assignee entered into an Intellectual Property Sale and Assignment Agreement as of the Effective Date pursuant to which Assignor sold, assigned, transferred and set over to Assignee, and Assignee assumed, all of Assignor’s right, title and interest in and to the United States Assigned Patents and certain other intellectual property; and

WHEREAS, Assignor and Assignee wish to document such assignment of the United States Assigned Patents in a form that is suitable for recordation with the United States Patent and Trademark Office.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby sell, assign, transfer and set over to Assignee, Assignor’s entire right, title and interest in and to the United States Assigned Patents, including any continuations, divisions, continuations-in-part, reissues, reexaminations, extensions thereof, and including the subject matter of all claims which may be obtained therefrom for its own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Patent Assignment and sale had not been made, together with the right to sue and collect for past and future infringement or other unauthorized use thereof, any and all corresponding rights that, now or hereafter, may be secured in the United States and the physical patent prosecution files in Assignor’s possession or under Assignor’s control of any of the foregoing.

Assignor authorizes and requests the United States Patent and Trademark Office to record Assignee as owner of the United States Assigned Patents, including any continuations, divisions, continuations-in-part, reissues, reexaminations or extensions thereof, and to issue any and all letters patent of the United States thereon to Assignee, as assignee of the entire right, title and

interest in, to and under the same, for the sole use and enjoyment of Assignee, its successors, assigns or other legal representatives.

Assignor shall take all actions and execute and deliver such other documents that Assignee may reasonably request to effect the terms of this Patent Assignment and to perfect Assignee's title in and to those United States Assigned Patents assigned to it hereunder.
