ASSIGNMENT

This Assignment is by Ji Zhang (the "Assignor"), residing at Burnaby, British Columbia, Canada. I Assignor have invented certain inventions (the "Invention(s)") described in a United States Patent Application entitled METHODS AND DEVICES FOR TRANSAPICAL DELIVERY OF A SUTURELESS VALVE PROSTHESIS (the "Application"), already filed on March 26, 2010 as U.S. Application No. 12/732,843.

CARDIOVANTAGE MEDICAL, INC., a corporation of the State of California, having a place of business at 891 Warren Way, Palo Alto, California 94304 ("Assignee"), desires to acquire the entire right, title and interest in and to the Inventions and the Application, and in and to any patents (collectively, "Patents") that may be granted for the Inventions in the United States or in any foreign countries.

For valuable consideration, the receipt and sufficiency of which we acknowledge, Assignor hereby sells, assigns, and transfers to Assignee, its successors, legal representatives and assigns, the entire right, title and interest in and to: the Inventions, the Application, and any Patents; any divisions, continuations, and continuations-in-part of the Application; any reissues, reexaminations, or extensions of any and all Patents; the right to file foreign applications directly in the name of Assignee; and the right to claim priority rights deriving from the Application (collectively, the "Rights"). Assignor warrants that he or she is the sole owner of the Rights, and that the Rights are unencumbered. Assignor also agrees to not sign any writing or do any act conflicting with this assignment, and, without further compensation, to sign all documents and do such additional acts as Assignee deems necessary or desirable to: perfect Assignee's enjoyment of the Rights; prepare and prosecute the Application or any other applications for Patents; conduct proceedings regarding the Rights, including any litigation or interference proceedings; or perfect or defend title to the Rights. Assignor requests the Commissioner of Patents to issue any Patent of the United States that may be issued on the Inventions to Assignee.
