PATENT ASSIGNMENT AGREEMENT

This PATENT ASSIGNMENT AGREEMENT (this "**Assignment**"), effective as of April 1, 2010, is entered into by and between THE DOW CHEMICAL COMPANY, a Delaware corporation ("**TDCC**"), DOW GLOBAL TECHNOLOGIES INC., a Delaware corporation ("**DGTI**"; together with TDCC, "**Assignors**"), and STYRON LLC, a Delaware limited liability company ("**Assignee**") (each, a "**party**," and collectively, the "**parties**").

WHEREAS, TDCC, the Styron Holdcos and STY Acquisition Corp. ("**Purchaser**"), a Delaware corporation, have entered into a Sale and Purchase Agreement, dated as of March 2, 2010 (the "**Purchase Agreement**"; unless otherwise defined herein, capitalized terms shall be used herein as defined in the Purchase Agreement), pursuant to which TDCC has agreed to sell, and Purchaser has agreed to purchase, the Styron Equity Interests (as defined in the Purchase Agreement); and

WHEREAS, Assignors have agreed to assign to Assignee all of Assignors' right, title and interest in and to the patents and patent applications identified on Schedule A hereto (the "**Patents**"), and Assignee desires to receive the Patents from Assignors.

NOW, THEREFORE, in consideration of the premises and the mutual agreements and covenants hereinafter set forth, the parties hereto agree as follows:

1. Assignment. (a) Assignors hereby irrevocably assign, transfer, convey and deliver to Assignee, free and clear of any Encumbrances (other than Permitted Encumbrances), and Assignee hereby receives from Assignors, all of Assignors' right, title and interest in and to the Patents for the United States and for all foreign countries, including, without limitation, the inventions and improvements described and claimed therein, all reissuances, revisions, divisionals, continuations, extensions, continuations-in-part and counterparts thereof and all corresponding rights that are or may be secured under the laws of the United States or any foreign country, now or hereafter arising or in effect, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns and other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignors if this Assignment had not been made, together with all rights to collect royalties, products and proceeds in connection with any of the foregoing and all rights to sue and recover damages or other relief for all past, present or future infringement, misappropriation or other violation of any of the foregoing, and all rights corresponding thereto throughout the world.

(b) Assignors hereby request the Commissioner of Patents and Trademarks in the United States Patent and Trademark Office, and the corresponding entities or agencies in any applicable foreign countries or multinational authorities, to record Assignee as the assignee and owner of the Patents and to deliver to Assignee, and to Assignee's attorneys, agents, successors or assigns, all official documents and communications as may be warranted by this Assignment.

2. Further Action. Assignors and Assignee shall each take, and shall cause their respective Affiliates to take, any and all additional actions as may be necessary or appropriate to effect the transactions contemplated hereby, including, but not limited to, execution of individual assignment documentation for filing with the authorities of each

individual country. The responsibility to file assignments with the national patent offices of each country shall be on the Assignee and the Assignee shall bear the cost of filing such assignments.

3. Counterparts. This Assignment may be executed and delivered (including by facsimile or other means of electronic transmission, such as by electronic mail in "pdf" form) in one or more counterparts, and by the different parties hereto in separate counterparts, each of which when executed shall be deemed to be an original, but all of which taken together shall constitute one and the same agreement.

4. Conflict. If there is any conflict between the Purchase Agreement and this Assignment, each of the Purchase Agreement and this Assignment is to be interpreted and construed, if possible, so as to avoid or minimize such conflict, but, to the extent (and only to the extent) of such conflict, the Purchase Agreement shall prevail and control.

5. Governing Law. This Assignment shall be governed by, and construed in accordance with, the Laws of the State of New York.

* * * * *

IN WITNESS THEREOF, the parties hereto have caused this Assignment to be executed as of the date first written above by their respective officers thereunto duly authorized.
