ASSIGNMENT OF PATENTS

WHEREAS, James P. Boyd., an individual, ("Assignor"), is the owner of record of the patents and patent applications identified in Exhibit A hereto ("Patents");

WHEREAS, Boyd Research, Inc., a California corporation, having a place of business at P.O. Box 2145, 7060 Via Del Charro, Rancho Santa Fe, California 92067, desires to acquire by formal, recordable assignment the entire right, title and interest in and to the Patents identified in Exhibit A;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby sells, assigns and transfers to Assignee, the entire right, title and interest in and to the aforementioned Patents, and to the invention(s) described and claimed therein that Assignor may now own or may have owned at any time, together with all rights of Assignor associated therewith, including any other patents and applications therefor on such invention(s) in the United States and throughout the world, and the right to sue for and collect damages by reason of past infringement of any and all of said Patents.

Assignor represents and warrants that it has not granted and will not grant to others any rights inconsistent with the rights granted herein, and that said Patents are free and clear of all encumbrances and liens.

Assignor further covenants and agrees that it will take all lawful steps, including testifying in any legal proceedings and executing any documents, that may be requested by Assignee, its assigns, and any corporate successors thereof, to obtain and enforce patent protection for the aforementioned patents.

IN WITNESS WHEREOF, Assignor has executed this Assignment this 14 day of July, 2010.
