PATENT AND INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

THIS AGREEMENT is made the 24 day of March 2010 by and between GATEWAY HOOK CO., LLC, ("Gateway"), a Texas limited liability company, and Allen Dean Mammel ("Mammel"), an individual who resides in Texas.

WHEREAS, Gateway and Mammel wish to document by formal assignment to Gateway of Mammel's title, interest and rights in and to the patent and patent applications described in Schedule 1.

Gateway and Mammel therefore agree as follows:

1. "Assigned Patents" shall mean the issued U.S. and foreign patents and patent applications listed on Schedule 1, including, but not limited to, (i) all know-how, trade secrets, discoveries, concepts, ideas, technologies, whether patentable or not, including processes, methods, formulas and techniques related to the foregoing, any and all written, unpatented technical or scientific information developed or acquired by Mammel, including laboratory and clinical notebooks, research data, research memoranda, computer software (including source code), computer records, scientist's notes, consultant reports, research reports from third parties, abandoned patent applications, invention disclosures, patentability reports and searches, patent and literature references, and the like developed or acquired before the date hereof related to such patents and patent applications; (ii) any and all copyrights, copyright registrations and copyrightable subject matter owned or controlled by Mammel related to such patents and patent applications; and (iii) any trademarks related to such patents or patent applications.

2. For good and valuable consideration, receipt of which is hereby acknowledged, Mammel hereby assigns to Gateway all of the right, title and interest in (i) the inventions disclosed in any patent or application listed on Schedule 1, (ii) the Assigned Patents, (iii) any U.S. or foreign Letters Patent which may issue from any application listed on Schedule 1, and (iv) all divisions, continuations, reissues, re-examinations and extensions of the patents and applications listed on Schedule 1. Mammel further acknowledges that included in this assignment is the right to bring suit to enforce any of the Assigned Patents against activities which occurred before the date of this Agreement. Such consideration shall be

- ONE HUNDRED DOLLARS (\$100.00); and
- TEN PERCENT (10%) of net annual income based on sales of products sold by Gateway that use the intellectual property assigned herewith, until Mammel's death. After Mammel's death, any such payment shall cease, and Mammel's estate shall have no further rights toward or benefits derived from the patent or application described on Schedule 1.

3. Mammel agrees to execute upon the request of Gateway any assignment paper or other document reasonably necessary to evidence the assignment of the rights hereunder to Gateway, and agrees to cooperate with Gateway in all other matters relating to the assignment of these rights to Gateway.

4. Mammel warrants that he has full ownership rights and authority to execute this assignment, and that no legal claims or encumbrances exist against his current ownership of the patent that he is assigning in this agreement.

5. This Agreement shall be construed in accordance with and governed by the laws of the State of Texas, excluding any choice of law rules which direct the application of the laws of another jurisdiction.

6. This Agreement constitutes the sole understanding of the parties with respect to the transactions provided herein and supersedes and merges herein any previous agreements and understandings, oral and written, between the parties hereto with respect to the subject matter hereof.

IN WITNESS WHEREOF, this Agreement was executed by Mammel and Gateway on March 24, 2010.
