RECITALS

Mr. Paolo ARA, who is now deceased, invented as a co-inventor certain new improvements concerning Process for the Plasticization of Lactic Acid Polymers (“invention”) during his lifetime. Executor is going to apply for a letters patent in the United States under 35 USC § 371, based on the international application PCT/ES2008/000038, on that invention as US Serial No. 12/864,093. Executor is now the co-owner, together with Stefano FIORI, the co-inventor, of the invention described and claimed in the specification, and of all rights in the invention. Assignees desire to acquire the entire right, title, and interest in the application, the invention and improvements thereon, and in any letters patent thereon when granted. In consideration of the foregoing recitals and the mutual promises and duties set forth below, the parties agree as follows:

SECTION ONE: ASSIGNMENT

In consideration of \$10.00 (ten dollars) received by Executor, Executor assigns to assignees the entire right, title, and interest in the application and the invention, and in any improvements on the invention, and in any letters patent on the invention and the improvements that may be granted.

SECTION TWO: COOPERATION

Executor agrees to cooperate with assignees so that the assignees may fully enjoy the assigned rights. This duty includes the duty to cooperate in any proceedings relating to the patent application, in priority contests, interferences and the like.

SECTION THREE: PARTIES BOUND

The terms, covenants, and conditions of this assignment are binding on the Executor, the estate and the heirs of Mr. Paolo ARA.

SECTION FOUR: WARRANTY

Executor warrants that he has not entered into any assignment, contract, or understanding which conflicts with this assignment.
