ASSIGNMENT

For good and valuable consideration, the receipt of which is hereby acknowledged, we, the undersigned, **Brian Cutter, David Gustafson, Howard Nuk, and Jonathan Rowell**, hereby sell, assign and transfer to ECOTALITY, Inc., its successors, assigns and legal representatives ("Assignee"), the entire right, title and interest for the United States and all foreign countries, in and to the ornamental designs for electric vehicle charging stations, invented by us and embodied in the drawings shown on Exhibit A hereto (the "Designs"), and in and to any and all patent applications and all nonprovisional, divisional, continuing, substitute, renewal, reissue, and all other applications for Letters Patent which have been or shall be filed in the United States and all foreign countries on the Designs or any of improvements to the Designs; and in and to all original and reissued patents which have been or shall be issued in the United States and all foreign countries on said improvements; and in and to all rights of priority resulting from the filing of said United States application. Counsel for Assignee is hereby authorized to file any said patent applications relating to the Design and to insert onto Exhibit A the application serial number thereof. The right, title, and interest transferred in this Assignment is to be held and enjoyed by Assignee as fully and exclusively as it would have been held and enjoyed by us had this Assignment not been made.

We hereby authorize and request any official whose duty it is to issue patents to issue any patent or other grants of protection on the Designs to Assignee.

We agree that said Assignee may apply for and receive Letters Patent for said improvements in its own name; and that, when requested, without charge to, but at the expense of, said Assignee, its successors, assigns and legal representatives, to carry out in good faith the intent and purpose of this assignment, the undersigned will execute all provisional, nonprovisional, divisional, continuing, substitute, renewal, reissue, and all other patent applications on any and all said improvements; execute all rightful oaths, assignments, powers of attorney and other papers; communicate to said Assignee, its successors, assigns, and representatives, all facts known to the undersigned relating to said improvements and the history thereof; and generally do everything possible which said Assignee, its successors, assigns or representatives shall consider desirable for aiding in securing and maintaining proper patent protection for said improvements and for vesting title to said improvements and all applications for patents and all patents on said improvements, in said Assignee, its successors, assigns and legal representatives.
