WHEREAS, Assignor, with a place of business at Manchester, England, had heretofore transferred and assigned to Assignee its entire right, title and interest in and to the patents and patent applications listed on Exhibit A hereto, said assignment having taken place on JUNE 1ST 2009; and

NOW, THEREFORE, for U.S. \$1.00, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor hereby states as follows:

1. Assignor hereby declares and affirms that it did sell, assign and transfer to Assignee, its successors, assigns and legal representatives, the entire right, title and interest in and to the Assigned Patents and Patent Applications and any and all inventions described and/or claimed therein and any and all patents and like rights of exclusion (including extensions thereof) of any country which may be granted on or for said inventions or on any counterpart, divisional, continuing, reissue, re-examination, extension, provisional or other patent application based on and/or claiming priority to any of said Assigned Patents or Patent Applications, the same to be held and enjoyed by the Assignee for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment had not been made, together with all causes of action (in law or equity), claims, demands and any other rights for, or arising from an past, present or future infringement of the Assigned Patents and Patent Applications, along with the right to sue for and collect any damages for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives.

2. Assignee hereby accepts said Assignment effective JUNE 1ST 2009.
