ASSIGNMENT OF PATENT APPLICATIONS

WHEREAS, BioMicro Systems, Inc., a Delaware corporation ("Assignor"), is the owner of the United States patent applications set forth in Schedule A hereto (collectively referred to as the "Patent Applications"); and

WHEREAS, Statspin, Inc., a Massachusetts corporation ("Assignee"), is desirous of acquiring the entire and exclusive right, title and interest in and to the Patent Applications and the underlying inventions described therein in the United States and throughout the world.

NOW, THEREFORE, for good and valuable consideration, receipt of which is hereby acknowledged, Assignor hereby assigns, sells, transfers and conveys to Assignee, and its successors and assigns, all of Assignor's right, title, and interest throughout the world in and to the Patent Applications, the underlying inventions described therein and all future improvements thereon, and any and all Letters Patents whether U.S. or foreign that are or may be granted therefrom including, without limitation, any and all extensions, continuations, continuations-in-part, divisions, reissues and renewals thereof, or other equivalents thereof, and further, all rights and privileges pertaining to the Patent Applications and any and all Letters Patents whether U.S. or foreign that are or may be granted therefrom including, without limitation, the right, if any, to sue or bring other actions for past, present and future infringement thereof.

Assignor further assigns to and empowers Assignee, its successors, assigns or nominees, all rights to make applications for patents or other forms of protection for said inventions and to prosecute such applications as well as to claim and receive the benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, and the right to invoke and claim such right of priority without further written or oral authorization.

Assignor agrees to (i) cooperate with Assignee in the filing and prosecution of the Patent Applications; (ii) execute, verify, acknowledge and deliver all such further papers, including applications and instruments of transfer; and (iii) perform such other acts as Assignee lawfully may request, to facilitate Assignee's right to obtain, protect, maintain, defend or enforce Letters Patents for said inventions and improvements thereof in any and all countries, and to vest title thereto in Assignee, or its successors and assigns. In the event that Assignee is unable for any reason whatsoever to secure Assignor's signature to any document when so required to effectuate fully the assignment hereunder, Assignor hereby irrevocably designates and appoints Assignee, and its duly authorized officers and agents as Assignor's agents and attorneys-in-fact, with full power of substitution, to act for and on its behalf and instead of it, to execute, acknowledge and deliver any and all instruments and assurances necessary or expedient in order to fully vest in Assignee or perfect the assignment hereunder or to protect the same or to enforce any claim or right of any kind with respect thereto. Assignor hereby declares that the foregoing power is coupled with an interest and is irrevocable.

IN WITNESS WHEREOF, Assignor has caused this Assignment of Patent Applications to be executed as of this 22nd day of November, 2010.

BIOMICRO SYSTEMS, INC.
a Delaware corporation
