WHEREAS, pursuant to the Intellectual Property Contribution Agreement among the Parties of even date herewith (the "Agreement"), Assignor has assigned to Assignee all Assignor's right, title and interest in the Contributed IP Assets (as defined therein) throughout the world, including any and all patents and pending patent applications listed on the attached Schedule 1, and all inventions described and claimed therein (including divisionals, continuations-in-part, provisionals, reissues, reexaminations or interferences thereof), whether or not any such applications are modified, withdrawn or resubmitted (collectively referred to as the "Patents"); and

WHEREAS, pursuant to the Agreement, Assignee has acquired all of Assignor's right, title and interest in and to the Contributed IP Assets, including the Patents, and the Parties wish to record such acquisition in the U.S. Patent and Trademark Office and all other applicable intellectual property offices; and

NOW, THEREFORE, for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

1. Pursuant to the Agreement, Assignor hereby irrevocably contributes, transfers, grants, bargains, assigns, conveys and delivers to Assignee, absolutely and not as collateral security, without recourse, except as expressly provided in the Agreement, as a capital contribution to the Assignee all of Assignor's right, title and interest in and to the Patents, together with the right to bring an action or proceeding at law or in equity or before any governmental authority for any past, present or future infringement or violation of any of the Patents, and to collect all damages, awards, settlements and proceeds relating to the Patents. Assignor further consents to recordation of this Assignment by Assignee, including with the U.S. Patent and Trademark Office.

2. This Patent Assignment may be executed simultaneously in two or more counterparts, each of which shall be deemed an original, but both of which together shall constitute one and the same instrument.

3. This Patent Assignment is subject to all the terms and conditions of the Agreement.
