WHEREAS, on or about September 1, 2005, Mika Sarkela, Satu Jaaskelainen, Jaakko Langsjo, Anu Maksimow, Elina Salmi and Harry Scheinin did sell, assign, and transfer to The General Electric Company, and its legal representatives, successors, and assigns, their entire right, title, and interest in and to their invention ("Invention") described and claimed in United States Patent Application Serial No. 11/176,969 filed on July 7, 2005 at the United States Patent and Trademark Office, now U.S. Patent No. 7,805,187 issued on September 28, 2010, and to all United States and foreign patent applications any of whose claims cover all or part of the Invention, to any prior or provisional application, including any application from which priority is claimed, together with all patents resulting from such applications including any continuations, divisions, reissues, reexaminations and extensions thereof and any applications claiming priority therefrom as recorded on September 1, 2005 at the United States Patent and Trademark Office at Reel 016483, Frame 0955.

WHEREAS, the listed assignee, The General Electric Company, was misnamed in the prior assignment, which should have designated General Electric Company, a New York corporation, as assignee.

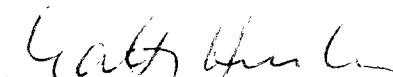

For good and valuable consideration, Mika Sarkela, Satu Jaaskelainen, Jaakko Langsjo, Anu Maksimow, Elina Salmi and Harry Scheinin hereby nunc pro tunc, effective September 1, 2005, sell, assign, and transfer to General Electric Company, ("**Assignee**"), a New York Corporation, doing business at One River Road, Schenectady, New York 12345, and to its legal representatives, successors, and assigns, their entire right, title, and interest in and to the Invention and to all United States and foreign patent applications any of whose claims cover all or part of the Invention, to any prior or provisional application, including any application from which priority is claimed, together with all patents resulting from such applications including any continuations, divisions, reissues, re-examinations and extensions thereof and any applications claiming priority therefrom. We agree, upon Assignee's request, to execute or assent to such United States and foreign patent applications and to execute all separate assignments and other legal documents that Assignee may find necessary or desirable in its exercise of the right, title, and interest assigned above. We also agree to communicate to Assignee any facts relating to the Invention or to any of the patent applications or patents contemplated above that may be useful to Assignee and to testify as to such facts in any interferences or in litigation, if requested to do so. We shall do all these things without additional compensation but at no expense to us.

We hereby request the Commissioner of Patents to issue to Assignee, as the owner of the Inventor's entire right, title, and interest therein, any Letters Patent of the United States that may be issued for the Invention.
