ASSIGNMENT

WHEREAS, I, ALEXANDER L. CHENG, have invented certain new and useful improvements in a Dynamic Channel Management and Signaling Method and Apparatus, which had been filed as an application for United States Patent on July 18, 1994 as application number 08/276,534, and issued on October 8, 1996 as U.S. Patent Number 5,563,883.

AND WHEREAS, C-CATION TECHNOLOGIES, LLC, a limited liability company organized and existing under the laws of the State of Texas and having a place of business at 150 Purchase Street, Suite 9, Rye, NY, 10580, U.S.A., is desirous of acquiring certain rights thereunder.

NOW, THEREFORE, for one dollar and other good and valuable consideration, receipt of all of which is hereby acknowledged, I have agreed to and hereby sell, assign and transfer unto said limited liability company the entire right, title and interest, in and throughout the United States of America (including its territories and dependencies) and all countries foreign thereto, in and to said invention, said application and any and all patents (including extensions thereof, and all the rights under the International Convention for the Protection of Industrial Property including the right to claim for any foreign patent application the priority date of the corresponding U.S. patent application) of any country, which have been or may be granted on said invention or any part thereof, or on said application or any divisional, continuing, renewal, substitute, reissue or other patent application based in whole or in part thereon, or based upon said invention;

TO BE HELD AND ENJOYED by said limited liability company, its successors and assigns, to the full ends of the respective terms of which said patents or any of them have been or may be granted, as fully and entirely as the same would have been held and enjoyed by me had no sale and assignment of said interest been made;

AND I do hereby authorize and request the Commissioner of Patents and Trademarks of the United States of America to issue any and all additional United States patents which may be granted upon said United States application or any of them, or upon said invention or any part thereof, to said limited liability company;

AND I hereby agree for myself and for my heirs, executors and administrators, to execute without further consideration any further lawful documents and any further assurances, and any divisional, continuing, renewal, substitute, reissue, or other applications for patents of any country, that may be deemed necessary by said limited liability company fully to secure to said limited liability company, its interest as aforesaid in and to said invention or any part thereof, and in and to said several patents or any of them;

AND I do hereby covenant for myself and my legal representatives and agree with said limited liability company, its successors and assigns, that I have granted no

right or license to make, use or sell said invention to anyone except said limited liability company, that, prior to the execution of this deed, my right, title and interest in said invention had not been otherwise encumbered, and that I have not executed and will not execute any instrument in conflict herewith.

IN WITNESS WHEREOF, I have hereunto set my hands and affixed my seal:

Alexander L. Cheng
