CONFIRMATORY PATENT ASSIGNMENT

THIS CONFIRMATORY PATENT ASSIGNMENT (the “**Confirmatory Patent Assignment**”) dated as of the 30th day of April 2009, is by and between Aquasure Technologies Inc., a corporation incorporated under the laws of the Province of Ontario, Ron Emburgh and Ravi Kanipayor (collectively referred to herein as the “**Assignors**”), and Wild River Capital Inc., a corporation incorporated under the laws of the Province of Quebec (“**Assignee**”);

WHEREAS pursuant to an Agreement of Settlement, Discharge of Debt and Mutual Release entered into between Assignors and Assignee and certain other parties dated as of April 30, 2009 (“**Agreement of Settlement**”), Assignors sold, assigned and transferred to Assignee, and Assignee acquired from Assignors, the entire right, title, and interest in and to the following inventions: (i) an invention entitled “**Portable Incubator**” as fully described and claimed in U.S. Patent No. 6,465,242, issued on the 15th day of October, 2002; (ii) an invention entitled “**System for rapid analysis of microbiological materials in liquid samples**” as fully described and claimed in U.S. Patent application No.11/122,089; and (iii) an invention entitled “**System for rapid analysis of microbiological materials in liquid samples**” as fully described and claimed in PCT patent application No. PCT/CA2005/000686, and any and all intellectual property in connection with the above patents and patent applications (collectively, the “**Intellectual Property Rights**”).

NOW THEREFORE, in consideration of the Agreement of Settlement and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignors confirm that they have sold, assigned and transferred to Assignee all rights, title and interests in and to the Intellectual Property Rights, including all re-examinations, reissues, divisions, renewals, extensions, provisional, continuations and continuations-in-part thereof, any and all rights to improvements thereto and to file international or foreign patent applications claiming priority to any of the foregoing, together with the right to sue and recover damages for past or future infringements of the Intellectual Property Rights and to fully and entirely stand in the place of Assignors in all matters related thereto. All said rights to be held and enjoyed by the Assignee, its successors, legal representatives and assigns, to the full end of the term for which said Intellectual Property Rights for all such countries may be granted, as fully and entirely as the same would have been held and enjoyed by Assignors if the assignment had not been made.

In further consideration of said good and valuable consideration, Assignors covenant and agree with Assignee that they have a full and unencumbered title to the Intellectual Property Rights hereby assigned, which title Assignors warrant unto Assignee, and Assignors further agree that they will, without demanding any further consideration therefor, at the request but at the expense of Assignee, do all lawful and just acts, including the execution and acknowledgment of instruments, furnishing of information and giving of testimony, that may be or become necessary for obtaining, sustaining, or reissuing the Intellectual Property Rights, and for maintaining and perfecting Assignee's

right to said Intellectual Property Rights, particularly in cases of interference and litigation.

Assignors hereby request the Commissioner of Patents or such other corresponding responsible authority to record this Confirmatory Patent Assignment.

This Confirmatory Patent Assignment may be executed in counterparts, each of which shall be an original and all of which when taken together shall constitute one and the same instrument.
