OP \$40.00 13037997

ASSIGNMENT OF PATENT APPLICATION

JOINT

WHEREAS, Jon D. Macklin; Walter C. Borneau Jr.; Jonathan P. Gluckman; and Igor Dorovskoy, hereinafter referred to as "Assignors," are the inventors of the invention described and set forth in the below-identified application for United States Letters Patent:

Title of Invention: SECURITY POLYMER THREAT DETECTION
DISTRIBUTION SYSTEM

Date(s) of execution of Declaration:

Filing Date: March 1, 2011

Application No.: 13/037,997; and

WHEREAS, Cubic Corporation., a corporation of the state of Delaware, located at 9333 Balboa Avenue, San Diego, CA 92123, hereinafter referred to as "Assignee," is desirous of acquiring an interest in the invention and application and in any U.S. Letters Patent and Registrations which may be granted on the same;

For good, valuable and appropriate consideration in the form of a patent award, Assignors have assigned, and by these presents do assign to Assignee all right, title and interest in and to the invention and application and to all foreign counterparts (including patent, utility model and industrial designs), and in and to any Letters Patent and Registrations which may hereafter be granted on the same in the United States and all countries throughout the world, and to claim the priority from the application as provided by the Paris Convention. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignors had this Assignment not been made, for the full term of any Letters Patent and Registrations which may be granted thereon, or of any division, renewal, continuation in whole or in part, substitution, conversion, reissue, prolongation or extension thereof.

Assignors further agree that they will, without charge to Assignors, but at Assignee's expense, (a) cooperate with Assignee in the prosecution of U.S. Patent applications and foreign counterparts on the invention and any improvements, (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer, and (c) perform such other acts as Assignee lawfully may request to obtain or maintain Letters Patent and Registrations for the invention and improvements in any and all countries, and to vest title thereto in Assignee, or Assignee's successors and assigns. Assignors waive any obligation of the Assignee to file foreign counterparts on the invention or continue pursuit of prosecution of U.S. Patent applications or foreign counterparts to the invention on behalf of the Assignor without any obligation of the Assignee to offer those rights to the Assignor even if the Assignee forgoes filing in a country or decides to not further prosecute an application in any country.
