ASSIGNMENT OF PATENT RIGHTS

I, YONG SIK KIM, residing in GERMANTOWN, MARYLAND, invented “DISPLACEMENT SENSOR WITH EMBEDDED COHERENT ELECTROMAGNETIC RADIATION INTERFEROMETER FOR MICRO SCALE PROXIMITY MEASUREMENTS (DECERIMPM).”

The invention was made while I was a Guest Researcher at the National Institute of Standards and Technology, the United States Department of Commerce, and under such circumstances that applicable laws, and regulations and agreements render the patent rights within the United States assignable to the United States. The United States of America, represented by the Secretary of Commerce, wishes to acquire these rights.

Therefore, I assign to the United States of America, as represented by the Secretary of Commerce, my full and exclusive rights within the United States to this invention. This invention and its derivative applications in the United States Patent and Trademark Office and United States Letters Patent are to be held by the United States of America for the full term for which such Letters Patent may be granted as completely as they would have been held by us had

we not made this assignment.

I agree to make, execute, and deliver to the Secretary of Commerce all documents in such usual or other forms, terms, or contents as may be required by the Secretary for the prosecution of all domestic applications arising from this invention, as well as after issuance of Letters Patent, and for the settlement of any interferences or other actions or proceedings these applications and Letters Patent may encounter. I will aid the United States of America in every way to protect the invention as requested by the Secretary, except that any expenses arising through such assistance will be borne, through proper arrangement, by the United States of America.

I warrant that there are no outstanding assignments, grants, liens, encumbrances, or agreements, oral, written, or implied, that will impair the interests conveyed in this assignment at the time I execute this instrument.

IN TESTIMONY WHEREOF, I sign.
