ASSIGNMENT

PARTIES TO THE ASSIGNMENT:

INVENTOR(S) – ASSIGNOR(S):

Name: Craig Shaber
Address: 1628 North Holiday Lane
Spokane Valley, WA 99016
United States

ASSIGNEE:

Name: Wagstaff, Inc.
Address: 3910 N. Flora Road
Spokane, WA 99216
United States

BACKGROUND OF THIS ASSIGNMENT:

Inventor has conceived certain new and useful inventions disclosed in a United States patent application titled Coolant Control and Wiper System for a Continuous Casting Molten Metal Mold, Serial No. 12/931,257, filed January 25, 2011.

Inventor is an employee of Wagstaff, Inc., and part or all of Inventor's duties include inventing and product development, including this invention.

Wagstaff, Inc. (hereinafter referred to as "ASSIGNEE") therefore owns the entire right, title and interest in said inventions and with respect to any Letters Patent that may be granted with respect to the inventions in both the United States and in all foreign countries.

THE PARTIES AGREE AS FOLLOWS:

In consideration of good and valuable consideration, and the employment relationship, the receipt of which is hereby acknowledged, Inventor does hereby sell, assign and transfer to ASSIGNEE the entire right, title and interest in the above-identified application executed concurrently with this assignment and to any reissues, divisions or continuations thereof, and hereby authorizes the Commissioner of Patents and Trademarks to issue such Letters Patent to ASSIGNEE for the sole use of ASSIGNEE, its successors or assigns. This transfer includes any Letters Patent that may be granted in the United States or in any foreign countries.

INVENTOR further agrees to execute, at the request and expense of ASSIGNEE such other formal documents as may be required to fully convey or record the interest transferred herein and will similarly execute any application papers required for the filing of any division, continuation or reissue of the patent application or resulting Letters Patent; and will generally do everything necessary or desirable to obtain and enforce proper protection for the inventions assigned hereby.

INVENTOR further assigns to ASSIGNEE the whole right, title and interest in the inventions disclosed in the application throughout all countries foreign to the United States. ASSIGNEE is hereby authorized to apply for patents relating to the inventions in its own name in countries where such procedure is proper; to claim the benefit of the International Convention; to file and prosecute International Applications relating to the inventions under the Patent Cooperation

INVENTOR agrees to execute applications relating to the inventions in those countries and under those conventions where it is necessary that the same be executed by the inventor, and to execute assignments of such applications and the resulting Letters Patent to ASSIGNEE, as well as all other necessary papers in relation to such applications and Letters Patent. In the event that INVENTOR is unable or unwilling to later execute all application related documents required by ASSIGNEE, INVENTOR hereby irrevocably grants ASSIGNEE the limited power of attorney to, as an attorney in fact for INVENTOR, to execute said documents on behalf of INVENTOR to have the same legal effect as though executed by INVENTOR.
