ASSIGNMENT

Pursuant to my obligation to Akustica, Inc. (hereinafter referred to as "Assignee"),
a Delaware corporation having its principal place of business at:

2835 East Carson Street, Suite 301
Pittsburgh, PA 15203 USA

and for other valuable and sufficient consideration, receipt whereof is hereby
acknowledged, I:

John M. Muza
116 Bridle Trail
Venetia, PA 15367

confirm my obligation to and hereby sell, assign and convey, unto Assignee, its
successors and assigns, except as set forth below, my entire right, title and interest -

(1) in and to inventions described in a patent application titled "MEMS
CAPACITIVE SENSOR BIASING CIRCUIT INCLUDING AN INTEGRATED INDUCTOR"
for which I filed United States Patent Application No. 13/110,360, (Atty. File No.
081276-9497-US00) (hereinafter the "U.S. utility patent application");

(2) in and to the U.S. utility patent application, in and to all other patent
applications (including divisional, continuation, continuation-in-part, §111(b) provisional,
§111(a), and reissue applications) based upon said invention, and in and to the patent or
patents to be granted thereon, to the full end of the term or terms for which said patent
or patents may be granted;

(3) in and to all patent applications on said invention now or hereafter filed in
countries foreign to the United States of America, including patent applications filed
under the Patent Cooperation Treaty, the European Patent Convention or any other
international treaty, and including the right to claim priority of said U.S. utility patent
application and in and to any and all patents granted on said applications to the full end
of the terms for which said patents may be granted.

I hereby authorize the assignee or attorney of record to insert in the appropriate
place in this document the application number of my application after execution of this

Assignment. I hereby agree that I will, upon demand of Assignee, its successors or assigns, and without further consideration to me, execute any and all papers that may be necessary, or deemed by Assignee, its successors or assigns, to be necessary, to a complete fulfillment of the intent and purposes of this Assignment, it being understood that any expense incident to the execution of such papers shall be paid by Assignee, its successors and assigns, and not by me.

The foregoing notwithstanding, and in recognition of the fact that Assignee is part of the Bosch group of companies, I hereby assign to Robert Bosch GmbH, a German corporation having a mailing address at Postfach 30 02 20, D-70442 Stuttgart, GERMANY, the limited right to be named as assignee or applicant at the time of publication and at the time of issue on any applications or patents granted as referred to in foregoing paragraphs (2) and (3). If the right applicable to any such patent application allows an assignee to be the applicant of the patent application, Robert Bosch GmbH shall have the right to be identified as applicant of the patent application and the right to claim priority of said U.S. utility patent application. This limited right granted to Robert Bosch GmbH with respect to any patent application or granted patent shall expire upon the first-occurring of (i) assignment to a third party of any of the above-mentioned rights of Assignee, or (ii) with respect to any particular patent, issue of such patent, and shall be subsequently part of the assignable rights of Assignee. All other rights to said invention, said applications and said patents, U.S. or foreign, including the right under any of said patents to manufacture, use, sell or offer for sale the invention covered by said patents, or to license or permit use of said invention, remain with Assignee and shall be assignable by Assignee without the consent of Robert Bosch GmbH.
