PATENT ASSIGNMENT

For good, valuable, and sufficient consideration, the receipt of which is hereby acknowledged, Josephine Abplanalp ("Assignor"), hereby assigns all its right, title, and interest in and to all the patents and applications described in Exhibit A to Precision Valve Corporation, Inc., a New York corporation ("Assignee"), its successors and assigns, effective as of June 20, 2011 ("Effective Date").

This assignment includes the entire right, title and interest in and to all patent and patent applications owned or controlled by Assignee, including, but not limited to, all patents, patent applications, the invention(s) described therein, all related provisional and non-provisional applications, and the patent(s) granted thereon, in all countries, including all divisions, continuations, continuations-in-part, substitutes, renewals, reexaminations, reissues, and extensions thereof in all countries throughout the world ("Patents") to be held and enjoyed by the said Assignee for its own use and behalf and for the use and behalf of its successors and assigns, to the full end of the term for which said Patents may be granted, as fully and as entirely as the same would have been held and enjoyed by Assignor had this assignment and sale not been made. Assignor reserves no right, title, or interest in these Patents.

Assignor authorizes the Commissioner of Patents and Trademarks of the United States, and any official of any other country empowered to issue patents, to record this assignment, and to issue or transfer Patents to the Assignee as owner of all right, title and interest therein, or otherwise as the Assignee may direct, in accordance with the terms of this assignment.

Assignor represents and warrants that (i) it has the full right, power and authority to enter into this assignment, (ii) it owns all right, title and interest in and to the patent application, (iii) it previously has not sold, assigned, transferred, conveyed or encumbered, and from and after the Effective Date shall not attempt to sell, assign, transfer, convey or encumber, any rights in the patent application except as set forth in this Assignment, and (iv) Assignor has not granted any third party licenses to the Patents.

Acknowledged and agreed:
