PATENT ASSIGNMENT

This **PATENT ASSIGNMENT**, dated April 27, 2011 (this “**Assignment**”), is entered into by and between Novell, Inc., a Delaware corporation having a primary place of business at 404 Wyman, Waltham, Massachusetts, USA 02451 (“**Assignor**”), and CPTN Holdings LLC (“**Assignee**”). Both Assignor and Assignee are collectively referred to herein as the “**Parties**.”

WHEREAS, Assignor and Assignee entered into a Patent Purchase Agreement dated November 21, 2010, and amended as of April 20, 2011 and April 25, 2011 (the “**Agreement**”); and

WHEREAS, pursuant to the Agreement, Assignor agreed to sell, assign, transfer, and convey to Assignee, and the Assignee agreed to have sold, assigned, transferred, and conveyed to Assignee, all right, title and interest Assignor has in and to the patent applications and patents listed in Exhibit A hereto (the “**Assigned Patents**”), including without limitation, any and all legal rights entitled by the original owner of the Assigned Patents and all rights of Assignor to collect royalties under such Assigned Patents, to prosecute all existing Assigned Patents worldwide, to apply for additional patents worldwide and to have Assigned Patents and such additional patents issued in the name of Assignee; and

WHEREAS, pursuant to the Agreement, Assignor agreed to sell, assign, transfer, and convey to Assignee, and the Assignee agreed to have sold, assigned, transferred, and conveyed to Assignee, all right, title and interest Assignor had as of November 21, 2010 (as defined in the Agreement, “**Effective Date**”) and as of the date hereof to sue for past, present and future infringement of the Assigned Patents, including without limitation all right, title and interest Assignor has in and to all causes of action and enforcement rights, whether known, unknown, currently pending, filed, or otherwise, in respect of the Assigned Patents, and all rights to pursue damages, injunctive relief and other remedies for past, current and future infringement of the Assigned Patents; and

WHEREAS, Assignor represented to Assignee on the Effective Date and again on the date hereof, that except as set forth in Exhibit C to the Agreement, Assignor and only Assignor had as of the Effective Date and has as of the date hereof good and marketable title to the Assigned Patents, including, without limitation, all rights, title, and interest in the Assigned Patents and the right to sue for past, present and future infringement thereof; and

WHEREAS, Assignor hereby represents to Assignee that no reissues, reexaminations, continuations, continuations-in-part, divisionals, foreign counterparts or extensions have been filed on or after the Effective Date to and including the date hereof on the patent applications and patents listed in Exhibit A, other than the continuations and national patents noted in the updated Exhibit D to the Agreement provided to Assignee on April 26, 2011.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as set forth herein.

Assignor hereby sells, assigns, transfers, and conveys to Assignee all right, title and interest Assignor has in and to the Assigned Patents as of the Effective Date, as the Assigned Patents have been supplemented since the Effective Date (it being understood that certain Assigned Patents have lapsed since the Effective Date), including without limitation, any and all legal rights entitled by the original owner of the Assigned Patents and all rights of Assignor to

collect royalties under such Assigned Patents, to prosecute all existing Assigned Patents worldwide, to apply for additional patents worldwide and to have Assigned Patents and such additional patents issued in the name of Assignee. For the avoidance of doubt, the Assigned Patents include, without limitation (1) any continuations filed on the patent applications and patents in Exhibit A between the Effective Date and the date hereof, inclusively, and (2) any national patents issued and national patent applications filed prior to, on or after the Effective Date on the patent applications and patents listed in Exhibit A with a country designation "EP".

In addition, Assignor hereby sells, assigns, transfers, and conveys to Assignee all right, title and interest Assignor had as of the Effective Date, as the Assigned Patents have been supplemented since the Effective Date (it being understood that certain Assigned Patents have lapsed since the Effective Date) to sue for past, present and future infringement of the Assigned Patents, including without limitation all right, title and interest Assignor had as of the Effective Date, as the Assigned Patents have been supplemented since the Effective Date (it being understood that certain Assigned Patents have lapsed since the Effective Date) in and to all causes of action and enforcement rights, whether known, unknown, pending, filed, or otherwise, in respect of the Assigned Patents, and all rights to pursue damages, injunctive relief and other remedies for past, current and future infringement of the Assigned Patents.

In addition, Assignor hereby sells, assigns, transfers, and conveys to Assignee (i) all right, title and interest Assignor had as of the Effective Date, as the Assigned Patents have been supplemented since the Effective Date (it being understood that certain Assigned Patents have lapsed since the Effective Date), to apply (or continue prosecution) in any and all countries of the world for patents, design patents, utility models, certificates of invention or other governmental grants for the Assigned Patents, including without limitation under the Paris Convention for the Protection of Industrial Property, the International Patent Cooperation Treaty, European Patent Convention or any other convention, treaty, agreement or understanding, and (ii) the rights, if any, to revive and/or continue prosecution of any abandoned lapsed, rejected, cancelled, expired or unenforceable Assigned Patents.

Assignor hereby authorizes the respective patent office or governmental agency in each jurisdiction to issue any and all patents or certificates of invention or equivalent which may be granted upon any of the Assigned Patents in the name of Assignee, as the assignee to the entire interest therein.

As a condition of the assignment, transfer and conveyance of the Assigned Patents, Assignee hereby agrees, solely with respect to the Assigned Patents, to (and shall cause any of its direct assignees of the Assigned Patents to) take such assignment, transfer and conveyance subject to all licenses, covenants not to sue and similar restrictions in effect prior to the Effective Date, in each case solely as identified in the Agreement, but only (i) to the same extent Assignor would be subject to such licenses, covenants not to sue and similar restrictions if Assignor had not assigned the Assigned Patents and (ii) only to the extent any such license, covenant not to sue or similar restrictions (x) is in effect prior to the date hereof, (y) involves a license, covenant not to sue or similar restriction on the Assigned Patents, and (z) requires Assignor to have subsequent assignees agree to comply with such licenses, covenant not to sue or similar restrictions. For the avoidance of doubt, Assignee also agrees solely with respect to the Assigned Patents to take such assignment, transfer and conveyance subject to all licenses,

covenants not to sue and similar restrictions in effect on Assignor prior to the Effective Date, that would in each case transfer to Assignee as a matter of law.

The terms and conditions of this Assignment shall inure to the benefit of Assignee, its successors, assigns and other legal representatives, and shall be binding upon Assignor, its successor, assigns and other legal representatives.

IN WITNESS WHEREOF this Assignment of Patent Rights is executed at 7:30 AM
on April 27, 2011.
