In consideration of good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by the undersigned Inventor/Assignor:

1. I agree to sell, assign and transfer and do hereby sell, assign and transfer to the above named Assignee, his successors and assigns, my entire and exclusive right, title and interest in and to the inventions claimed and described in the above-identified patent applications in the United States and throughout the world, and in and to any applications for patent and patents which may be granted and issued thereon in any and all countries, and in and to any continuations, divisions, reissues, extensions, and reexaminations of said applications and patents and all priority rights associated therewith. 4. I irrevocably appoint Assignee, and any subsequent assignees if individuals or the corporation's president or limited liability company's managing members of the assignee, as the case may be, to act as my agent and attorney-in-fact to perform all acts necessary to obtain and/or maintain patents to any inventions assigned under this assignment if I refuse to perform those acts, or am unavailable, within the meaning of any applicable laws.
