(B) The contributions of the Inventor(s) to the Invention were made in the course of the duties of the Inventor(s) as employee(s) of the Employer, and either the circumstances were

such that an invention might reasonably have been expected to result from the carrying out of those duties, or the nature of those duties was such that the Inventor(s) had a special obligation to further the interests of the Employer's undertaking.

(C) The Inventor(s) and the Employer believe that, either by operation of law or by virtue of an agreement entered into by the Inventor(s) and the Employer before the making of the Invention, the Employer was, at the time the Invention was made, entitled to the whole of the property in the contributions of the Inventor(s) to the Invention.

(D) The Employer has assigned or has agreed to assign all its rights title and interest in to under and arising from the Invention, the "Priority Application(s)" (which is or are set out in Part 1 of the Schedule hereto) and the Completion Application(s) to the Assignee.

(E) In case the Employer for any reason was not, at the time the Invention was made, entitled to the whole of the property in the contributions of the Inventor(s) to the Invention, and in order to ensure and to provide documentary evidence that the Assignee is now the owner of both the legal title and the beneficial interest in the contributions of the Inventor(s) to the Invention, including any further contributions that the Inventor(s) may make to the development or improvement of the Invention and any matter that shall be contained in any future applications linked by one or more priorities to the Completion Application(s) ("Future Application(s)"), the Inventor(s) and the Employer have agreed to execute this formal Assignment to the Assignee of all such rights title and interest in to under and arising from the Invention, the Priority Application(s), the Completion Application(s), and any Future Application(s) and all matter that shall be contained in any Future Application(s), as they each may own.

Operative provisions:

In consideration for the payment of £1.00 by the Assignee to each of the Employer and the Inventor(s), the receipt and sufficiency of which are hereby acknowledged by the Employer and the Inventor(s):-

1 The Employer and the Inventor(s) HEREBY SELL ASSIGN AND TRANSFER to the Assignee, by way of current assignment of both existing and future rights and property, absolutely and free from encumbrances and with effect from immediately prior to the filing of each Completion Application:

1.2 all such rights as they may have to apply for prosecute and obtain patents and other intellectual property protection anywhere in the world in respect of the Invention and any invention(s) that shall be disclosed in and all matter that shall be contained in any Future Application(s) to the intent that any patents or other intellectual property protection for the Invention and for such invention(s) and matter may be applied for and shall be granted in the name of and shall vest in the Assignee or its successors or assigns (either alone or jointly with any co-applicants);

1.3 all such rights as they may have to claim priority from any or all of the Priority Application(s) and the Completion Application(s) and any Future Application(s) in any and all applications for patent protection for the Invention and any invention(s) that shall be disclosed in

any Future Application(s), such rights to be enjoyed by the Assignee as from the date of filing of each patent application from which priority is claimed;

to the intent that the Assignee shall have and hold the rights title and interest hereby assigned as fully and entirely as the same would have been held and enjoyed by the Inventor(s) or by the Employer had this assignment not been made.
